Contact Person:	Phone: [Phone]	E fil:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE POST THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (N 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED		LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions those hazards and then to further take steps to either the conditions of the conditions are or conditional talks.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Inadequate training, improper use of equipment	ЗН	<ul> <li>Ensure all workers are given appropriate training in the use and operation of the asphalt paver.</li> <li>Provide regular refresher courses to keep we use up-to-date on safety protocols.</li> <li>Develop a comprehensive understanding of the manufacturer's instructions for the asphalt paver.</li> <li>Implement a rigorous inspection protocol ensure equipment is checked before each use.</li> <li>Establish clear communication to estamongst team users to report any faults or issues with the manufacturer fromp.</li> <li>Mandate the use of person I prote to equif ent (PPE) like hard hats, work gloves, safety, basses, and igh-visible couning at all times.</li> <li>End on the workers take regular breaks to reduce fatigue and maintain focus.</li> <li>Enforce and tadhonice to procedural guidelines when using the asphalt paver.</li> <li>Facilitate readar meanings to discuss improvements in safety measures and didress brice or related to the use of the equipment.</li> <li>Counter a hazard reporting system where workers can report safety incidents or near manufacturers and signage around the working area to prevent unauthorised atouss.</li> <li>Equip machine operators with devices that emit warnings, signals, or alerts if an unsafe condition is detected.</li> <li>Conduct periodic audits to ensure compliance with workplace health and safety standards and to identify potential areas for improvement.</li> </ul>	2M	
2. Site Inspection	Tripping hazards, exposure to weather conditions	3Н	<ul> <li>Ensure the site is clear of any obstacles that may cause tripping or slipping hazards, such as clutters, debris or uneven ground surfaces.</li> <li>Conduct risk assessments on a regular basis and maintain records of inspections to identify potential hazards earlier.</li> <li>Employ the use of appropriate personal protective equipment (PPE) at all times. This may include high-visibility clothing, safety boots, gloves, slip-resistant footwear, weather-appropriate clothing, etc.</li> <li>Prepare for rough weather conditions by securing all loose objects at the site so they cannot blow away. If severe weather occurs, stop work immediately and seek shelter.</li> <li>Train all personnel to recognise and manage risks associated with weather exposure. Education should be conducted during induction courses and reinforced through toolbox talks.</li> </ul>	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Install temporary weather protection structures where weather conditions might affect the safety or well-being of staff.		
			- Develop immediate response plans for emergence related to adverse weather conditions which includes first aid arrangement and evacuation plan.		
			- Implement best practices for manual hance g and lifting prevent injuries. Provide training where necessary.		
			- Signposts and barriers must be in place to deligate hazards a pas, control movement around the site at a indicate direction a scape round.		
			- Assign an onsite supervisor to antinuously monito and es. The supervisor would be responsible to a suring antrols are being maintained and reviewing their effectiveness and arry. It's so got for staff to port any hazard, incidents or nearmisses to the apervisor.		
			- Employer correctioning techniques: Bend the knees and keep the back straight while in the great abjects to prevent strain-related injuries.		
			Regular training programs: Ensure workers are appropriately trained and educated an safe action related to machine set-up, thus reducing the risk of manual limiting liuries.		
			Use a canical aids where possible: The use of forklifts, trolleys or other echanical devices can greatly reduce the chance of injury from manual handling talls.		
			Correct work station layout: Ensuring the workspace is set up ergonomically and there is plenty of room for maneuverability can help prevent accidents.		
	Manual handling injures, crushed		- Breakdown of tasks: If practical, breaking down tasks into smaller, manageable ones can help minimise the risks associated with manual handling injuries		
3. Machine Set-up	fingers or hands	4A	- Machine guarding: All moving parts should have adequate guards to protect workers' fingers and hands during operation.	3H	
			- Regular equipment maintenance: An effective machine maintenance routine will ensure all machines function properly and lower the risk of jamming that may result in crushed fingers or hands.		
			- Personal Protective Equipment (PPE): Providing and enforcing the use of gloves, safety glasses and steel toe boots will offer extra protection against crush injuries.		
			- Emergency stop controls: Making sure Asphalt Paver has clearly-marked and fully-functional emergency stop controls easily accessible by operators.		
			- Safety signage: Display appropriate hazard signs near the work area to remind workers about the potential risks involved with operating machinery.		
			- Safe lockout/tagout procedures: Implement a systematic procedure for locking out and tagging out machines when they are not in use or being serviced.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

#### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

I hink of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.
