Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE B PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with agislative requirements to first identify any site hazards, conditions unical those hazards and then to further take steps to either the conditions of the cond	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Trip and fall, improper use of tools	2M	 Implement a site induction for all personnel to familiarise them with potential tripping and fall hazards present on the worksite. Incorporate regular safety briefings focusing and proper use of backhoe attachments, as well as addressing other prontial risks related to this task. Create a site-specific risk assessment, prion sing bit sink activities like loading and unloading machinery or working near utility. Develop instructions for encoyees regarding sale operation and usage of equipment, improving overall competency among operate. Keep walkways and treast are and clean to prevent tripping hazards. Ensure appropriate single is in plue to have light any control risk zones. Encourage to use of perunal proteins a quipment (PPE) that might include sturd to ark bot shart has, gloves, any nigh visibility clothing to mitigate the risk of injury or githe to process. Emply size egular to bit inspection and maintenance. This would ensure tools used are in glod withing condition and safe for use. Frain elloyer on how to respond in case of emergencies, such as falls or equipment failure. Establical reliable system of communication on site, to ensure that potentially transcous conditions can be immediately reported and addressed. Consider the physical capabilities of workers before assigning jobs. Avoid having mexperienced or physically incapable individuals handle heavy machinery or complex tasks. Allocate sufficient rest breaks to prevent fatigue, which could lead to accidents due to lack of focus or carelessness. If possible, automate dangerous tasks to reduce worker exposure to hazards. Regularly review and update your safe work method statement (SWMS) so it remains an effective team reference guide for managing and controlling identified hazards. Employ traffic management measures when heavy machinery is in use to protect both workers and motorists passing by the site. 	1L	
2. Attach backhoe	Misoperation due to inexperience, equipment failure	3Н	 Provide proper training and regularly assess workers on their operating skills to ensure they are equipped to handle the backhoe attachments effectively. Establish a regular maintenance schedule for the backhoe to prevent any potential equipment failure. Develop and enforce a pre-use inspection procedure to identify any safety issues before commencing work. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Ensure all workers involved in the operation are utilizing appropriate personal protective equipment (PPE) such as gloves, hard hats, steel-toe boots, high visibility vests, etc.		
			- Implement use of machine guards and other to devices to protect against hazards that may emerge during operation		
			- Enforce strict compliance with standard opening practice for operating backhoe attachments.		
			- Allocate tasks based on a wayker's competency of experime level to minimize risk associated with misoperate due to inexperient		
			- Make sure emer constructed and understood by employe involve in the tas'		
			- Utilize warning signs and parricades the working area to keep unauthorized personal at a seed districte.		
			- Prore to culture reporting near misses or any perceived risks - big or small, instant ctile should taken to rectify reported issues.		
			- Mainta a c. o and erly work environment to reduce unwanted incidents.		
			- ke re lar by ks to prevent operator fatigue which can lead to errors and		
			² egular colbox talks should be performed to refresh worker's knowledge about sty controls and to discuss any upcoming tasks and potential hazards.		
			- Carry out comprehensive pre-use checks on the backhoe attachment focusing on any signs of wear, tear, or damage.		
			- Use only well-maintained equipment which has been serviced according to the manufacturer's instructions and schedule.		
			- Have a trained mechanic on-site or easily reachable for immediate correction of identified faults to prevent equipment failure.		
Check functionality	Equipment failure, unguarded parts	3H	- Inspect and verify safety guards are in place and working properly before starting work to protect against unguarded parts.	2M	
			- Ensure all workers operating the backhoe have undergone proper training and are competent in recognising and responding to potential issues.		
			- Implement a system which necessitates regular inspection and maintenance of the backhoe attachments.		
			- Install clear, visible signage around areas where backhoes are being used to warn others of potential hazards.		
			- Control access to the work zone. Only necessary personnel who are aware of the potential hazards should be allowed near the operating backhoe.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

I hink of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.							
ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS				
The company details have been entered, including the project name and address.							
Names and signatures of all relevant personnel consulted during the development of the SWMS.		D'					
Name, signature, position and date signed of the person approving the SWMS.							
Specific personnel and qualifications, experience is noted in the SWMS.	P						
Provides a step-by-step process of tasks required to carry out the activity or task.							
Adequate risk assessment of any identified hazards has been completed.							
Foreseeable hazards are identified and documented for each step.							
Any hazards listed in any site risk assessments have been added to the SWI							
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.							
Check control measures added to the SWMS are the most effecting sections.							
Responsible person is assigned and listed on the SWMS for the implementation of contameasures.							
Permit requirements specified, such as Hot Wee, Electrical Work, Verat Heights etc.							
SWMS identifies plant and equipment to be u 1.							
Details of inspection checks required for any equipment listed at noted on the SWMS.							
Describes any mandatory qualifications, experience raining skills required to perform the work.							
Applicable personal protective equipment is selected on the SWMS.							
Lists any required permits or licenses.							
Reflects and documents any legislative references and/or Australian Standards.							
Identifies any hazardous substances used with specific control measures in line with any SDS.
