ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A	ALL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
requirements to first identify any site hazards, conduction inical those	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must study unately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips and falls, Inappropriate PPE	2М	<ul> <li>Inspect the work area for potential slip, trip and fall hazards before beginning work, such as uneven ground or loose debris, and take new sary actions to mitigate these risks.</li> <li>Wear appropriate PPE, including slip-resident boots, long-sleeved clothing, gloves, and safety goggles during the preparation pueses to prevent exposure to chemicals and other workplace hazards.</li> <li>Fnsure all workers are properly trained in hande n and operately backpack sprayers to prevent any accidents or misuse.</li> <li>Arrange tools and cherent healty in designated stande areas, keeping the work area clutter-free durinime tripple bazards.</li> <li>Practice glow housekeeping by regently extensing the work area, removing spills, and ensuring workways on free of obscurons.</li> <li>Appendestip a prevent any accidents or musices that may become slippery when wet, such a concrete file is or paths near spraying areas.</li> <li>Provide adde thate lighting in the work area to ensure visibility and highlight any notential azari.</li> <li>Nextain and test the backpack sprayer regularly to ensure it functions correctly and say the dentifying any possible issues before use.</li> <li>Glearly mark hazards in the work environment, such as raised platforms or steps, to alert workers to potential risks.</li> <li>Provide a method for securing hoses, cords, and other objects in the work area to prevent tripping hazards.</li> <li>Implement an incident reporting system that encourages workers to report any observed hazards or accidents, allowing management to address issues promptly.</li> <li>Encourage open communication among staff on safety concerns, fostering a proactive approach to hazard identification and mitigation.</li> <li>Regularly review and update Safe Work Method Statements (SWMS) as needed to account for new equipment, tasks, or workplace conditions that may pose risks.</li> </ul>	1L	
2. Mixing Chemicals	Chemical contact, Inhalation of chemical fumes	ЗН	<ul> <li>Utilise Personal Protective Equipment (PPE): Always wear appropriate PPE, such as chemical-resistant gloves, goggles, and a facemask to minimise potential exposure to chemicals during the mixing process.</li> <li>Proper ventilation: Ensure that adequate ventilation is provided in the area where chemicals are mixed. If working indoors, open windows or turn on exhaust fans to help eliminate fumes and ensure a safer work environment.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Storage of chemicals: Store chemicals in their original containers and label them correctly to avoid any confusion or accidental misuse during mixing.		
			- Follow manufacturer's instructions: Always follow as proper mixing instructions and recommended ratios provided by the chemical conditionation of prevent overexposure or inadequate mixture result.		
			- Double-check all measurements: Accurately reasure and weigh the correct quantities of each chemical component to ensure correct ratio for safe and effective use.		
			- Chemical mixing containers: e designated mixing computers, clearly labelled for the specific chemical are in ded for to prevent ass-contamination.		
			- Clean spillage unmediates in case of any set or clean up the area promptly using appropriate to sedures an material, edicate on the Safety Data Sheet (SDS) of the chemical in elved.		
			- Emery response plan: Develop and communicate an emergency response plan in the of accurate involving chemical exposure or spills, ensuring that all person of a trained becordingly.		
			Safe d posal, waste Dispose of any hazardous waste generated from the mixing press c cordin to local regulations and environmental guidelines to protect won, back the environment.		
			Regular equipment maintenance: Maintain sprayers, mixing containers, and other exipment involved in the process regularly to ensure good working order and miximise the risk of leaks or malfunctions.		
	G		- Training: Provide regular training for employees handling and mixing chemicals, covering safety procedures, correct usage, and the potential hazards associated with these substances.		
			- Communication: Encourage open communication among team members to share concerns, incidents, or near misses involving chemical handling and mixing, fostering a culture of continuous improvement and safety in the workplace.		
			- Utilise appropriate personal protective equipment (PPE) such as gloves, goggles and aprons when handling chemicals to prevent splashes and exposure.		
			- Read and comply with the manufacturer's instructions and safety data sheets for backpack sprayer and chemicals in use.		
3. Filling Sprayer	Splashes, Manual handling strain	2M	- Store chemicals in their original container, properly labelled and in secure, well-ventilated storage areas.	1L	
			<ul> <li>Practice proper manual handling techniques when lifting and carrying backpack sprayers, such as bending from the knees and having a firm grip on the sprayer handle.</li> </ul>		
			- Conduct training sessions for employees on correct methods of filling and using backpack sprayers to ensure safe operation and awareness of potential hazards.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

#### SAL WO A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to revised if necessary) if relevant control measure are subcontract of the SWMS and their health and safety representatives who reworkplace.

ke sure it remains effective and must be reviewed (and are subcontractions) who may be affected by the operation sentatives who received that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

#### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		<b>P</b>	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	<b>_</b>		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting sections.			
Responsible person is assigned and listed on the SWMS for the impementation of continue measures.			
Permit requirements specified, such as Hot Wren, Electrical Work, Venerat Heights etc.			
SWMS identifies plant and equipment to be upd.			
Details of inspection checks required for any equipment listed ar noted on the SWMS.			
Describes any mandatory qualifications, experience training skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
