Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Trip hazards, inadequate lighting	2M	 Proper housekeeping: Keep work area clean and tidy at all times to minimise the risk of trip hazards. Ensure that all obstacles or debrit are removed from walking paths and work areas. Implement a high-quality walking surfacer a untain a slip resistant and even walking surface in the workplace, making an necessary pairs immediately. Install adequate lighting: Ensure that work are a cell-lit to reduce trip hazards due to poor visibility. Replace any faulty light fixtures to bulbs as necessary. Mark potential hazards clean, the safety signs, not reprovings, or hazard tape to draw attention to any collarities or changes in walk to surfaces that could pose a trip hazard. Routinely in sect workspace: Assign ersonal to regularly monitor and review the work area for to present of trip hazar and implement preventative measures as require. Provide a propriate PPE: Issue suitable personal protective equipment (PPE) such as non-lip totwear a amployees to help prevent accidents caused by slippery floors on never surface. Inductorial rip hazards, proper use of PPE, and following safe work procedures. Manage, ords and hoses effectively: Secure electrical cords, hoses, and cables which the workspace to prevent them becoming a trip hazard. Attach these cords to wars or overhead beams where possible, using cable management systems or clamps. Establish designated walkways: Create well-defined and consistent pathways throughout the workplace, utilising signage and other indicators to maintain orderliness and prevent trip hazards in high-traffic areas. Encourage reporting of potential hazards: Foster an open communication culture among your employees to encourage reporting of any trip hazards they encounter during their work. Address reported issues swiftly to prevent incidents from occurring. 	1L	
2. Equipment Inspection	Electrical hazards, worn-out blade	3Н	 Conduct routine equipment inspection, ensuring all electrical components are in proper working condition and free from any damage. Make sure the power cord is securely and safely connected to a suitable power outlet, including checking for the presence of a Residual Current Device (RCD). Inspect the band saw regularly for wear and tear, especially around the blade guard and other safety features. Replace any worn or damaged parts as required. Verify that all emergency stop buttons and switches are functioning correctly and are easily accessible during operation. 	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Check for worn-out blades, chips, cracks, or excessive build-up on the blade's surface. If necessary, replace the blade with an approved one for the specific task.		
			- Keep the workspace clean and clear of dust, deband trip hazards to reduce the risk of injury due to slips, trips, and falls.		
			- Ensure adequate lighting is provided in the rork area to low for easy identification of potential hazards and enable the operator operformer tasks safely.		
			- Utilise appropriate personal protective equipment (PPE), such as safety glasses, hearing protection, and cut-in stant gloves, at all these while the end saw.		
			- Follow manufact go lines regular maintenance and servicing of the band saw to prolong affespan d min. se risk of function.		
			- Train all em, vees on the correct us be using, and safety procedures of the band to low the minood of accions and injuries.		
			- Prove pipe signing ge in the immediate vicinity of the band saw, alerting users to potential a prical a mechanical hazards.		
			- Implement a candate clockout/tagout procedure when performing service or sintenance on the band saw to eliminate the risk of unexpected energising, start-up. The lase of stored energy.		
			Report observed or suspected hazards immediately to the relevant supervisor ensure timely assessment and corrective action takes place.		
			- Fuster a culture of safety through consistent communication and sharing of knowledge about potential hazards and best practices in the workplace.		
	5		- Regularly inspect the band saw blade for damage, including broken or missing teeth, ensuring it is suitable for the intended material.		
			- Conduct pre-operation checks on the band saw to identify any issues with the blade assembly and alignment before commencing work.		
			- Ensure only trained and authorised personnel are able to select, mount, and operate the band saw according to the manufacturer's guidelines.		
3. Saw Blade Selection	Inappropriate blade type, incompatible teeth count	3H	- Select an appropriate blade type based on the material being cut and the desired outcome, always adhering to the manufacturer's recommendations.	1L	
			- Choose the correct number of teeth per inch (TPI) for the intended cutting application, taking into account factors such as material hardness, thickness, and surface finish requirements.		
			- Provide clear signage near the band saw outlining blade selection criteria and the required PPE for each type of operation.		
			- Implement a maintenance schedule for the regular replacement and sharpening of blades to maintain optimal cutting performance.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Consult the Safety Data Sheet (SDS) for the material being cut to determine any specific safety precautions related to its composition.		
			- Equip the band saw with appropriate safety device, such as guards, anti-kickback mechanisms, emergency stop buttons, and sate switches to reduce risks during operation.		
			- Utilise adequate ventilation systems and extraction apprent to minimise dust and fume exposure while operating the band saw.		
			- Encourage ongoing communication between woods rs regard a safe work practices and procedures within the desirated work area, in the desirated work area.		
			- Make relevant calning, in action, and resources available to all staff for the ongoing impresent of will place so type a uards, especially in relation to the correct blade so action.		
			- Con and by revision of update risk assessments and Safe Work Method Staten in SWMs to ensure they accurately address potential hazards associated with baild so blade ection and use, and adequately outline appropriate control measure.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.
