requirements to first identify any site hazards, conditions those	NAME	SIGNATURE	DATE
on the severity of the incident, a meeting will be called with all workers to amend			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Conduct a thorough inspection of the work area to identify and remove any potential trip hazards such as loose cables, building aterials or debris.		
			- Implement clear signage and barriers to highly specific areas where trip hazards may be present or during equipment setup to operations		
			- Organise tools and equipment in designate a torace leas, ensuring they are not left lying around where they could cause trip here.		
			- Regularly review and update isk assessments to each we seep to ensure all potential hazards have been it stiffied, and appropriate and measures are in place.		
			- Provide comprehensive to hing to orkers on safe use and handling of equipment, it iding corresponded to for a citing, inspecting, and maintaining equipment.		
1. Preparation	Trip hazards, incorrect equipment selection	2M	- Ensure at only perment that has been maintained according to the manufacture as perment that has been maintained according to the manufacture as perment that has been maintained according to the	1L	
			- Utilise orre manus andling techniques when moving or lifting heavy items, and seek as stands from coneagues if the load is too heavy for one person to manage ly.		
			Emp. p-resistant footwear for all workers in the work area, and enforce proper tire guidelines to limit the chances of injuries due to tripping or slipping.		
			- Lourage open communication between team members so that any concerns regarding safety issues, like trip hazards, can be raised and addressed promptly and effectively.		
			- Schedule regular safety briefings, refresher courses, and toolbox talks to remind workers about the importance of workplace safety and staying vigilant about reducing potential hazards.		
			- Continually monitor the work environment throughout the day, making necessary adjustments as required to maintain a safe and hazard-free workplace.		
			- Ensure all workers handling the delivery and unloading of materials have received proper manual handling training, including correct lifting techniques and load estimation.		
2. Delivery & Unloading	Manual handling injuries, impact from moving equipment	3H	- Provide appropriate mechanical aids, such as trolleys, dollies, or pallet jacks, to assist workers in moving heavy or unwieldy items safely.	2M	
			- Establish a designated unloading area with clear marking and signage to indicate where deliveries should be made and to minimise pedestrian traffic in this zone.		
			- Set up barricades or safety cones around the designated unloading area to provide a buffer between workers and moving equipment or vehicles.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			 Designate one person to act as a safety spotter, tasked with providing clear coordination and communication during the delivery and unloading process to prevent collisions or accidents. Ensure all workers wear high-visibility clothing a vests to make them easier to spot, especially in areas with restricted visit by or when operating around heavy machinery. Mandate the use of appropriate personal protein equipment (PPE) for workers involved in manually handling bricks or other manuals, such an loves, safety boots, and protective eyewear. Limit the time works are end or manual handling target as y assigning work in rotation or incorrecting real arbitals to help mingate fatigue-related injuries. Enforce a set ad limit for a wing equation and vehicles within the worksite, ensuring that he her specified are reserved a designated roadways or paths away from unloading at a difficiency of the proving experience of the designated roadways or paths away from unloading at a difficiency of the proving experience of the hazards within the unloading and the proving experience of the hazards within the unloading and preview control measures and responsibilities, and discuss any new potential rise that may not have been previously identified. Encourage workers to report any near-miss situations, hazards or injuries promptly, and conduct risk assessments to determine further control measures that may need to be implemented. Monitor and review the effectiveness of control measures regularly, updating them if necessary based on changes in work processes or advances in available technology for managing risks. 		
3. Machine Set-up	Potential entanglement or pinching, noise levels	2M	 Proper Training: Ensure that all workers operating the Brick Welko Press have received comprehensive training on machine setup, safety guidelines, and potential hazards associated with the equipment. Machine Guarding: Install appropriate machine guards to prevent entanglement or pinching hazards. These may include barrier guards, light curtains, or interlocked safety switches. Clear Work Area: Maintain a clean and organised work area around the Brick Welko Press to minimise clutter and tripping hazards. This also includes keeping floors clear of oil, grease, or other slippery substances. Personal Protective Equipment (PPE): Provide workers with appropriate PPE such as safety gloves, earplugs, safety goggles, and proper footwear to protect them from potential hazards during the machine set-up process. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Lockout/Tagout Procedures: Implement lockout/tagout procedures to ensure that the Brick Welko Press is de-energised and locked out during maintenance or whenever it's not in use. This will prevent any accidental startup and exposure to moving parts.		
			- Adequate Lighting: Ensure adequate lightings available during the machine set-up process to enable workers to safely perform peir tasks an identify hazards.		
			- Regular Inspections: Conduct regular inspections the Brick Welko Press to identify and address any potential safety risks, in adding worn-parts or damaged safety guards.		
			- Emergency Stop Progress Equip he Brick Welko Progressible and accessible emergency stop button to allow for a quick shutdown in case of potential hazards or accuents.		
			- Noise Reduce of Meast as: Implement assures to reduce noise levels. These might ude in the disc barriers, utilising acoustic enclosures, and maintaining mach a clower ration levels.		
			- Safe beining Productives: Develop and implement standard operating procedules (\$\infty\$ S) follows Brick Welko Press that outline detailed steps for the achine let-up locess. Make sure all workers are familiar with these SOPs. - Co. The sample improvement: Encourage workers to report any hazards or safety		
			oncern at they come across while setting up the Brick Welko Press. Regularly riew and update control measures based on feedback from employees and new found risks.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Tollow any Sale work instructions which are provided, and agrees to use all reisonal riotective Equipment where appropriate.

		SAF WO A S	THUD STATEMENT	MONITORING AND	REVIEW		
The SWMS must be review revised if necessary) if relevations consultation with workers (in of the SWMS and their healt workplace. When the SWMS has been an advised that a revision has been who will need to change a way that will enable them the will be involved in the work in the survey.	ant control measu cluding contractors and subth and safety representatives revised the PCBU must ensive made and how they call ork procedure or system as to implement their duties contract be provided with the reliable contract.	The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to: 1. Spot Checks. 2. Consultation with workers, contractors and sub-contractors. 3. Internal audits on a continual basis. An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures					
them to understand and implement the revised SWMS. that the PCBU is consistently developing ever-improving systems of safe work principles.
