

**Bun Divider | SAFE WORK METHOD STATEMENT (SWMS)**

**TASK OR ACTIVITY: Bun Divider**

Business Name: [Company Name]	ABN: [ABN]	SWMS#
Business Address: [Company Address]		
Contact Person:	Phone: [Phone]	Email:

**THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PROJECT MANAGER OF THE PROJECT**

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature: \_\_\_\_\_ Title: \_\_\_\_\_ Date: \_\_\_\_\_

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name: \_\_\_\_\_ Title: \_\_\_\_\_ Phone: \_\_\_\_\_

**ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED**

**NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS**

	NAME	SIGNATURE	DATE
Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.			
If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.			

**CLIENT OR PRINCIPAL CONTRACTOR DETAILS**

Client:	SCOPE OF WORKS Provide a detailed description of the specific work being carried out (otherwise known as scope of works).
Project Name:	
Project Address:	
Project Manager:	
Contact Phone:	
Project Manager Signature:	
Date SWMS supplied to Project Manager:	

**ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT**

<input type="checkbox"/> involves a risk of a person falling more than 2 meters.	<input type="checkbox"/> is carried out on or near pressurised gas mains or piping.
<input type="checkbox"/> is carried out on a telecommunication tower.	<input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines.
<input type="checkbox"/> involves demolition of an element of a structure that is load-bearing.	<input type="checkbox"/> is carried out on or near energised electrical installations or services.
<input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure.	<input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere.
<input type="checkbox"/> involves, or is likely to involve, disturbing asbestos.	<input type="checkbox"/> involves tilt-up or precast concrete.
<input type="checkbox"/> involves structural alteration or repair that requires temporary supports to prevent collapse.	<input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor.
<input type="checkbox"/> is carried out in or near a confined space.	<input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant.
<input type="checkbox"/> is carried out in/near a shaft or trench deeper than 1.5m or tunnel involving use of explosives.	<input type="checkbox"/> is carried out in areas with artificial extremes of temperature.
<input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning.	<input type="checkbox"/> involves diving work.

**ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY**

<input type="checkbox"/> Forklift	<input type="checkbox"/> Crane/s	<input type="checkbox"/> Hoist/s	<input type="checkbox"/> Excavator	<input type="checkbox"/> Backhoe/Loader	<input type="checkbox"/> Boom Lift	<input type="checkbox"/> EWP	<input type="checkbox"/> Genie Lift
<input type="checkbox"/> Trencher	<input type="checkbox"/> Drilling Rig	<input type="checkbox"/> Trucks	<input type="checkbox"/> Formwork	<input type="checkbox"/> Bobcat	<input type="checkbox"/> Flammable Gas	<input type="checkbox"/> Fuel	<input type="checkbox"/> Dozer
<input type="checkbox"/> High Voltage	<input type="checkbox"/> Mulcher	<input type="checkbox"/> Tilt-up Panels	<input type="checkbox"/> Roller	<input type="checkbox"/> Scissor Lift	<input type="checkbox"/> Tractor	<input type="checkbox"/> Other -	

**RISK MATRIX**

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			<b>Elimination</b> Remove the hazard.
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Substitution</b> Replace the hazard.
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	<b>Isolation</b> Isolate People from the hazard
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	<b>Engineering</b> Isolate the hazard.
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	<b>Administrative</b> Change the work. <b>PPE</b>

**Notes on Hierarchy of Controls:** Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

**PERSONAL PROTECTIVE EQUIPMENT (PPE)**

FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE/FACE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips and falls, improper lifting techniques	2M	<ul style="list-style-type: none"> <li>- Provide adequate training for all employees on proper lifting techniques, to prevent injuries from improper handling of the bun divider.</li> <li>- Implement a clean-as-you-go policy to ensure that any spills or debris are promptly cleaned up to minimise the risk of slips and falls.</li> <li>- Conduct regular inspections of the work area to identify potential hazards and take corrective action when needed.</li> <li>- Provide non-slip floor mats in high traffic areas and around the bun divider to prevent slips and falls.</li> <li>- Encourage employees to wear slip-resistant footwear appropriate for the workplace environment.</li> <li>- Clearly mark any uneven flooring or changes in elevation with high-visibility paint or signage to reduce trip hazards.</li> <li>- Install handrails and grab bars in areas where balance may be compromised to assist employees in maintaining their footing.</li> <li>- Ensure that proper lighting is installed and maintained in the work area, allowing employees to see potential hazards more easily.</li> <li>- Instruct employees on how to use equipment safely, including loading and unloading bins from the bun divider.</li> <li>- Establish designated storage areas for all tools and materials to prevent them from becoming trip hazards.</li> <li>- Schedule regular maintenance checks for the bun divider and other equipment to ensure they are in safe working condition, addressing any issues found immediately.</li> <li>- Encourage open communication between employees and management to report any concerns about potential hazards or unsafe conditions.</li> <li>- Develop an emergency response plan detailing procedures for incidents such as falls or injuries related to the bun divider, ensuring all employees are trained on the plan and know what to do in case of an emergency.</li> <li>- Review the SWMS regularly, updating it as necessary to address any new hazards or control measures identified in the course of work, and communicate these updates to all relevant employees.</li> </ul>	1L	
2. Load bun divider	Crushing injuries, pinch points	3H	<ul style="list-style-type: none"> <li>- Proper training: Ensure all workers operating the bun divider have received adequate training in safe operation of the equipment and are aware of the hazards associated with loading the bun divider.</li> <li>- Inspection of equipment: Before use, conduct a thorough inspection of the bun divider to identify and address any potential risks, such as damaged or worn parts that may cause pinch points or crushing.</li> </ul>	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Safety guards: Make sure all safety guards and barriers are in place and functioning correctly to protect workers from coming into contact with moving parts during the loading process.</li> <li>- Protective gloves: Require workers to wear appropriate protective gloves when handling buns for the divider, reducing the risk of pinching or crushing injuries.</li> <li>- Ergonomics: Design the workstation layout in a manner that allows workers to load buns without having to reach or bend excessively, minimising the risk of strain injuries related to awkward postures.</li> <li>- Clear signage: Place warning signs and labels on the bun divider, indicating dangers of pinch points and crushing areas, ensuring that workers stay alert and informed.</li> <li>- Emergency stop controls: Ensure that emergency stop controls of the bun divider are easily accessible and working properly, allowing immediate cessation of the equipment's operation in the event of a hazard.</li> <li>- Regular maintenance: Perform periodic maintenance and cleaning of the bun divider to maintain its proper functioning and reduce the risk of equipment issues leading to workplace accidents.</li> <li>- Communication and supervision: Encourage open communication among team members regarding safety concerns and incidents, and provide adequate supervision to ensure safe work practices are followed consistently.</li> <li>- Load limit adherence: Monitor the bun divider's load capacity and establish guidelines for how many buns can be safely processed at a time, preventing overloading and operator fatigue.</li> <li>- Lockout/tagout procedures: Implement lockout/tagout procedures when servicing or repairing the bun divider, protecting workers from accidental energising of equipment.</li> <li>- Incident reporting and follow-up: Establish a system for workers to report hazards or incidents related to the bun divider, and promptly address any safety concerns that arise.</li> <li>- Continuous improvement: Regularly evaluate and update safety guidelines and training programs for the bun divider, incorporating new advancements in safety practices and technology as necessary.</li> </ul>		
3. Adjust settings	Machine entanglement, electrical hazards	2M	<ul style="list-style-type: none"> <li>- Regular equipment maintenance: Conduct periodic inspections and maintenance on the bun divider to ensure all components are in good working order and any issues are identified and remedied swiftly.</li> <li>- Employee training: Provide comprehensive training and ongoing support for all employees tasked with operating the bun divider, ensuring they are familiar with the machine's settings and safeguards to prevent entanglement and electrical hazards.</li> <li>- Clear signage: Display clear warning signs near the bun divider, alerting workers to potential hazards and reinforcing safe operating procedures.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Power isolation: Employ lockout/tagout procedures during maintenance or cleaning to isolate the power source and prevent accidental activation of the machine, reducing the risk of electrical hazards and machine entanglement.</li> <li>- Emergency stop buttons: Install easily accessible emergency stop buttons at various locations around the bun divider, allowing operators to halt the machine instantly in case of an emergency.</li> <li>- Protective clothing: Ensure all employees wear appropriate personal protective equipment (PPE), such as gloves, long sleeves, and closed-toe shoes, when working with the bun divider to reduce the risk of entanglement or injuries.</li> <li>- Safety guards: Attach safety guards to the bun divider in key areas, such as around gear systems and moving parts, to prevent accidental contact and minimise the risk of entanglement.</li> <li>- Pre-shift checks: Require operators to perform a pre-shift inspection and adjustment of the bun divider settings, confirming that the machine is ready for use and functioning correctly to mitigate work-related hazards.</li> <li>- Workplace organisation: Maintain a well-organised and clutter-free workspace around the bun divider to reduce distractions and allow operators to concentrate solely on their tasks.</li> <li>- Equipment documentation: Keep a detailed log of any maintenance, repairs, or adjustments made to the bun divider, helping to identify recurring issues and streamline troubleshooting processes in the future.</li> <li>- Breakaway technology: Consider incorporating breakaway technology into the bun divider, which can detect abnormal force or resistance and automatically disengage the machine to prevent accidents or damage.</li> <li>- Thorough electrical inspections: Schedule regular inspections by a qualified electrician to verify that no worn out, loose or damaged electrical components are in the bun divider, thus preventing potential electrical hazards.</li> </ul>

**SIGNATORIES OF THE SAFE WORK METHOD STATEMENT**

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

**SAFE WORK METHOD STATEMENT MONITORING AND REVIEW**

**The SWMS must be reviewed regularly** to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

**The SWMS must be monitored regularly** for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST			
This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.			
ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.	<input type="checkbox"/>	<input type="checkbox"/>	
Names and signatures of all relevant personnel consulted during the development of the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input type="checkbox"/>	<input type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input type="checkbox"/>	<input type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Check control measures added to the SWMS are the most effective solutions.	<input type="checkbox"/>	<input type="checkbox"/>
