

Crawler Crane SAFE WORK METHOD STATEMENT (SWMS)								
	TASK OR ACTIVITY: Crawler Crar	ne						
Business Name: [Company Name]		ABN: [ABN]	SWMS#					
Business Address: [Company Address]								
Contact Person:	Phone: [Phone]	E gil:						
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PL OF THE PROJECT						
Under the Work Health and Safety Regulation (WHS Regulation), a person conductive proposed work starts.	cting a business or undertaking (k 3U) is	required to thurs at a safe work method s	statement (SWMS) is prepared before					
Full Name:								
Signature:		Title:	Date:					
Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWMS well as review	s and modifications of the SWMS.						
Full Name:		Title:	Phone:					
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. TE AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND					
Safety meetings or toolbox talks will be sched and in accordance with regislative requirements to first identify any site hazards, conductions unical those hazards and then to further take steps to either the scheder or control each hazard.	NAME	SIGNATURE	DATE					
If an incident or a near miss occurs, all work must study unately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.								
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.								
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Unstable ground, Falling objects	ЗН	 Identify access and egress points for the crawler crane and keep them clear of obstructions at all times. Reassess and confirm the ground conditions only or whenever there's a significant change in weather, which can impact its structy. Use load spreaders under crawler tracks we work or no soft or uneven ground to prevent tipping of the crane. When moving equipment or exaterials near the once, ensure as done safely so that nothing falls onto crane operatives or the crane set. Suitable barriers is used erect around the cranes working radius to prevent any unauthoring entry into the date of zone. No attachments shall be used to the crane working and use to prevent any unauthoring wafe-work providures. All glub bersons thould wear high-visibility clothing and adhere to all necess by a sonal waterive equipment requirements. Place warly cane operator has valid competency certificates and is experienced with the work of crane in use. Suitable crane operator has valid competency certificates and is experienced with the work of crane in use. The weight and dimensions of each load must not exceed the stated capacity of the crane. Always use accurate weighing devices if necessary. Make sure that every lifting operation is planned by a competent person, who can account for potential risks and variables such as wind conditions and nearby power lines. Regularly inspect and maintain the crawler crane according to manufacturer's instructions. Any issues identified should be immediately addressed to ensure the safety and reliability of the machinery. 	2М	
2. Equipment Inspection	Malfunctioning equipment, Inadequate maintenance	4A	 Regular inspections: Thorough and regular inspection must be performed on the crane and the equipment associated with it, adhering to manufacturer's guidance to ensure that it is functioning properly. Maintenance schedule: Ensure a proper maintenance schedule is followed as recommended by the manufacturer. A thorough check should be done after every repair or part replacement. 	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			 Professional assessment: Use qualified personnel to regularly conduct professional assessments of the equipment to identify potential issues early. 		
			- Use of warning devices: Ensure all safety feature and warning devices on the crane are operational before use.		
			- Approved equipment: Only approved and prtified equipment should be used during operations.		
			- Training: Provide adequate training to workers o will operate or work near the crawler crane in understandic vits operation and contral har cas.		
			- Incident documentation: Any he function or incident would be documented and responded to immediate, prevent further mishaps.		
			- Safe storage store all equipment to design ed area to avoid potential damages or accidents to in not in <i>v</i> . Ensure to susekeeping practices around the site.		
			- Good string to all this Make sure that the equipment is only used in proper working to ditions		
			- Emery incy repare ess: In case of an emergency caused by malfunctioning equipment, the vorkplasion should be equipped with an Emergency Action Plan (EAP) simmenate a con.		
	1		- Oper to competence: Ensure that the crane operator has received necessary and odated, using, skills and competency relating to crane operation and intenance.		
			- Spare parts: Always have readily available spare parts for prompt replacement in case a defect or wear out is found in any of the components during inspection.		
			- Feedback system: Implement a feedback mechanism to help identify the recurring issues and remedying them preventing future recurrence.		
			- Implement regular safety briefings: These are meetings to remind all crew members about potential hazards, safety protocols, rules and regulations about the job site.		
			- Ensure attendance of all operatives: Make sure that everyone on the job site attends each briefing so no one misses out on important information.		
3. Safety Briefings	Lack of hazard awareness, Non- adherence to safety protocols	ЗН	 Personal Protective Equipment (PPE): Mandate that all workers on-site wear appropriate protective clothing and equipment at all times, such as high-visibility vests, hard hats, and safety shoes. 	1L	
			- Regular hazard identification and risk assessment: Continually monitor and assess the workplace for potential hazards and risks which can evolve throughout the course of the job.		
			- Clear communication: Ensure that there is clear, effective communication between all team members, particularly in relation to identifying and managing hazards.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Adherence to operating procedures: Strictly enforce adherence to approved working methods and safe use of equipment.		
			- Safety signage: Install safety signs around the weighte to remind workers of particular dangers or precautions they should the should the statement of the should the should the statement of the should the statement of the should the statement of the statement		
			- Emergency response training: All employ should be used in emergency procedures to ensure a rapid, controlled response to situation.		
			- Regular inspection of equipment: Plan and excere regular corporehensive inspections of the crawler crawlar dother releval, quipmer		
			- Travelling and lifting procedure. Provide guideline, and adding the travelling and lifting procedures to encount we handling a crawler crane, taking into account load capacities and ground condition		
			- Safe work no bod statements (SWN, sevelop and implement SWMS for specific activity to add as presental hazards as a control measures. Staff must be trained in the present use of our in the SWMS.		
			- Train g a Componencies: Ensure all staff are adequately trained and competent to carry, ut the r dutile pafely. This includes holding valid licenses and certifications, where required

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAF WO A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to revised if necessary) if relevant control measure are revised if necessary) if relevant control measure are revised of the SWMS and their health and safety representatives who reworkplace.

ke sure it remains effective and must be reviewed (and are subcontractions) who may be affected by the operation sentatives who received that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWN			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effection sections.			
Responsible person is assigned and listed on the SWMS for the impement of continue assures.			
Permit requirements specified, such as Hot Wrent Electrical Work, Versat Heights etc.			
SWMS identifies plant and equipment to be up.			
Details of inspection checks required for any equipment listed approved on the SWMS.			
Describes any mandatory qualifications, experience reining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
