

**Electrical Safety | SAFE WORK METHOD STATEMENT (SWMS)**

**TASK OR ACTIVITY: Electrical Safety**

Business Name: [Company Name]	ABN: [ABN]	SWMS#
-------------------------------	------------	-------

Business Address: [Company Address]

Contact Person:	Phone: [Phone]	Email:
-----------------	----------------	--------

**THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT**

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature:	Title:	Date:
------------	--------	-------

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name:	Title:	Phone:
------------	--------	--------

**ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED** | **NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS**

	NAME	SIGNATURE	DATE
Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, to conduct and communicate those hazards and then to further take steps to either eliminate or control each hazard.			
If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.			

**CLIENT OR PRINCIPAL CONTRACTOR DETAILS**

Client:	SCOPE OF WORKS Provide a detailed description of the specific work being carried out (otherwise known as scope of works).
Project Name:	
Project Address:	
Project Manager:	
Contact Phone:	
Project Manager Signature:	
Date SWMS supplied to Project Manager:	

**ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT**

<input type="checkbox"/> involves a risk of a person falling more than 2 meters.	<input type="checkbox"/> is carried out on or near pressurised gas mains or piping.
<input type="checkbox"/> is carried out on a telecommunication tower.	<input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines.
<input type="checkbox"/> involves demolition of an element of a structure that is load-bearing.	<input type="checkbox"/> is carried out on or near energised electrical installations or services.
<input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure.	<input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere.
<input type="checkbox"/> involves, or is likely to involve, disturbing asbestos.	<input type="checkbox"/> involves tilt-up or precast concrete.
<input type="checkbox"/> involves structural alteration or repair that requires temporary support to prevent collapse.	<input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor.
<input type="checkbox"/> is carried out in or near a confined space.	<input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant.
<input type="checkbox"/> is carried out in/near a shaft or trench deeper than 1.5m or tunnel involving use of explosives.	<input type="checkbox"/> is carried out in areas with artificial extremes of temperature.
<input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning.	<input type="checkbox"/> involves diving work.

**ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY**

<input type="checkbox"/> Forklift	<input type="checkbox"/> Crane/s	<input type="checkbox"/> Hoist/s	<input type="checkbox"/> Excavator	<input type="checkbox"/> Backhoe/Loader	<input type="checkbox"/> Boom Lift	<input type="checkbox"/> EWP	<input type="checkbox"/> Genie Lift
<input type="checkbox"/> Trencher	<input type="checkbox"/> Drilling Rig	<input type="checkbox"/> Trucks	<input type="checkbox"/> Formwork	<input type="checkbox"/> Bobcat	<input type="checkbox"/> Flammable Gas	<input type="checkbox"/> Fuel	<input type="checkbox"/> Dozer
<input type="checkbox"/> High Voltage	<input type="checkbox"/> Mulcher	<input type="checkbox"/> Tilt-up Panels	<input type="checkbox"/> Roller	<input type="checkbox"/> Scissor Lift	<input type="checkbox"/> Tractor	<input type="checkbox"/> Other -	

**RISK MATRIX**

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Elimination</b> Remove the hazard.
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Substitution</b> Replace the hazard.
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	<b>Isolation</b> Isolate People from the hazard
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	<b>Engineering</b> Isolate the hazard.
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	<b>Administrative</b> Change the work. <b>PPE</b>

**Notes on Hierarchy of Controls:** Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

**PERSONAL PROTECTIVE EQUIPMENT (PPE)**

FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE/FACE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

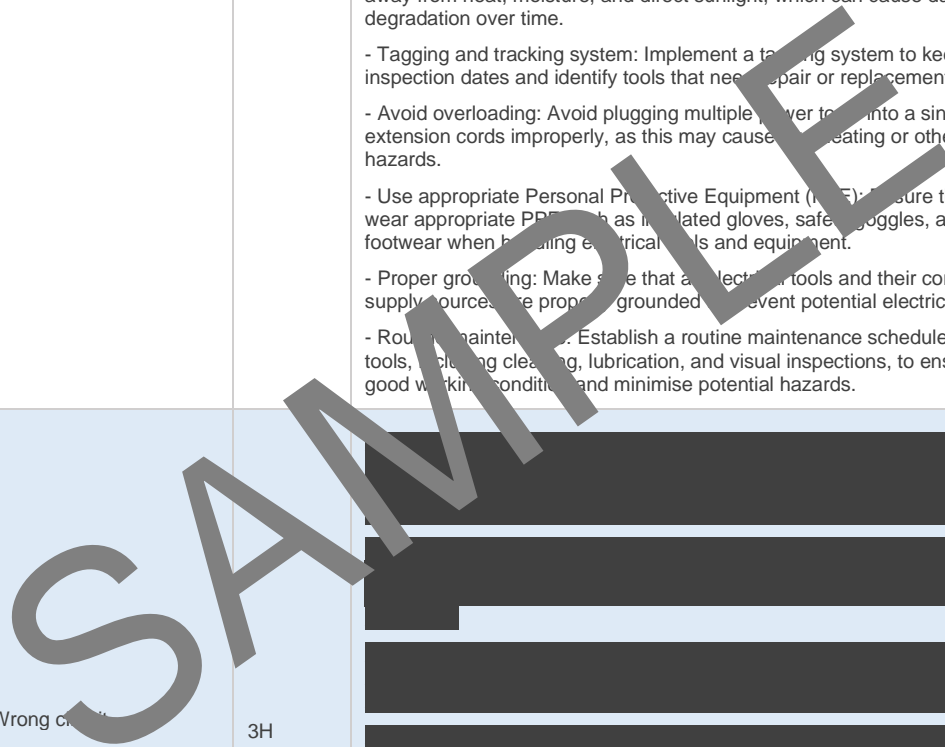

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Trip hazards, Electrocution risk	2M	<ul style="list-style-type: none"> <li>- Conduct a thorough site inspection prior to commencing work to identify potential trip hazards and electrical risks.</li> <li>- Ensure that all workers are aware of the identified hazards and provided with proper training on electrical safety practices, including emergency response procedures.</li> <li>- Mark and communicate any identified hazards such as exposed cables or equipment, using warning signs or barrier tape.</li> <li>- Keep walkways, working areas, and access routes clear of unnecessary items or equipment, including exposed cables and tools, to minimise the risk of tripping.</li> <li>- Clearly label electrical equipment and circuit breakers to facilitate identification and prevent accidental contact or tampering.</li> <li>- Use non-conductive materials for ladders, tools, and other equipment to reduce the risk of accidental electrocution.</li> <li>- Regularly inspect power cords and extension leads for damage, wear, or fraying and replace them immediately if needed to avoid possible electrocution risks.</li> <li>- Implement a lockout/tagout system for equipment undergoing maintenance or repair to ensure no one inadvertently energizes it while another worker is at risk.</li> <li>- Ensure circuit breakers are appropriately rated and installed for the corresponding equipment to prevent overloading and eliminate potential electrocution hazards.</li> <li>- Maintain an appropriate distance from overhead power lines and take measures to ensure that tools, equipment, and machinery do not come into contact with them.</li> <li>- Use Ground Fault Circuit Interrupters (GFCIs) on all temporary electrical circuits to monitor the flow of electricity and shut off power if an imbalance is detected.</li> <li>- Encourage a "safety-first" culture where workers feel comfortable reporting hazards or unsafe conditions without fear of repercussions, helping to maintain a safe working environment.</li> <li>- Provide personal protective equipment (PPE) such as insulated gloves, boots, and safety eyewear to protect workers from potential electrical hazards.</li> <li>- Schedule regular toolbox talks and refresher training sessions to ensure workers stay updated on best practices for electrical safety and to reinforce the importance of adhering to workplace health and safety protocols.</li> </ul>	1L	
2. Inspection	Electrical shock, Faulty equipment	3H	<ul style="list-style-type: none"> <li>- Conduct regular inspections of all electrical equipment, tools, and machinery to ensure they are in good working condition.</li> <li>- Make sure that a qualified electrician performs any necessary repairs or maintenance on electrical equipment and systems.</li> <li>- Provide workers with appropriate personal protective equipment (PPE) such as insulated gloves and safety goggles to minimise the risk of electrical shock.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Implement a system for tagging and isolating faulty equipment, ensuring that they are taken out of service until repaired or replaced.</li> <li>- Implement a clear lockout/tagout (LOTO) procedure to ensure that any machinery or equipment under inspection is properly powered down and locked out before work begins.</li> <li>- Provide proper training to employees on electrical safety, including the proper use of equipment and the dangers associated with working around electricity.</li> <li>- Utilise Ground Fault Circuit Interrupters (GFCIs) on all electrical outlets to prevent potential shocks from occurring due to grounded faults.</li> <li>- Encourage workers to report any damaged, frayed, or exposed wiring immediately to their supervisor or workplace health and safety representative.</li> <li>- Regularly test and maintain fire extinguishers and other firefighting equipment to be prepared in case of an electrical fire.</li> <li>- Ensure that adequate ventilation is in place, particularly in enclosed spaces, to prevent the buildup of hazardous gases, vapors, or dust that may cause electrical hazards.</li> <li>- Keep electrical panels and power sources clear of any debris or obstructions, maintaining at least 1 meter of clearance around them.</li> <li>- Establish a safe workspace by using barriers, warning signs, or cordoning off the area where electrical work is being performed.</li> <li>- Use only double-insulated tools and extension cords, ensuring that they are appropriately rated for the intended use.</li> <li>- Instruct workers to always use one hand when operating switches or plugging/unplugging equipment, so as to minimise the risk of completing an electrical circuit with their body.</li> </ul>		
3. Tool setup	Ratting or damaged cords, Exposed electrical components	3H	<ul style="list-style-type: none"> <li>- Regular inspection: Conduct a thorough inspection of all electrical tools and equipment prior to use, ensuring there are no damaged or frayed cords.</li> <li>- Repair and replacement: Repair or replace any tools with damaged cords or exposed electrical components immediately, and remove them from service until they are safe to use.</li> <li>- Safety training: Provide regular training for employees on proper tool setup, usage, and storage procedures to minimise the risk of electrical hazards.</li> <li>- Use of Ground Fault Circuit Interrupters (GFCIs): Plug all electrical tools into GFCI-protected outlets or use GFCI adapters to reduce the risk of electrocution in case of a fault.</li> <li>- Use electrical tape: Apply electrical tape on minor cuts or abrasions on cords as a temporary solution until the cord can be replaced. However, don't rely solely on electrical tape for permanent repairs.</li> </ul>	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Proper storage: Store all electrical cords and tools in a dry, well-ventilated area away from heat, moisture, and direct sunlight, which can cause damage and degradation over time.</li> <li>- Tagging and tracking system: Implement a tagging system to keep track of inspection dates and identify tools that need repair or replacement.</li> <li>- Avoid overloading: Avoid plugging multiple power tools into a single outlet or using extension cords improperly, as this may cause overheating or other electrical hazards.</li> <li>- Use appropriate Personal Protective Equipment (PPE): Ensure that employees wear appropriate PPE such as insulated gloves, safety goggles, and non-conductive footwear when handling electrical tools and equipment.</li> <li>- Proper grounding: Make sure that all electrical tools and their corresponding power supply sources are properly grounded to prevent potential electrical shock hazards.</li> <li>- Routine maintenance: Establish a routine maintenance schedule for all electrical tools, including cleaning, lubrication, and visual inspections, to ensure they remain in good working condition and minimise potential hazards.</li> </ul>

**SIGNATORIES OF THE SAFE WORK METHOD STATEMENT**

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

**SAFE WORK METHOD STATEMENT MONITORING AND REVIEW**

**The SWMS must be reviewed regularly** to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

**The SWMS must be monitored regularly** for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

**SAFE WORK METHOD STATEMENT REVIEW CHECKLIST**

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.	<input type="checkbox"/>	<input type="checkbox"/>	
Names and signatures of all relevant personnel consulted during the development of the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>
