

**Electrical Testing | SAFE WORK METHOD STATEMENT (SWMS)**

**TASK OR ACTIVITY: Electrical Testing**

Business Name: [Company Name] ABN: [ABN] SWMS#

Business Address: [Company Address]

Contact Person: Phone: [Phone] Email:

**THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT**

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature: Title: Date:

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name: Title: Phone:

**ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED** NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

	NAME	SIGNATURE	DATE
Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.			
If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.			

**CLIENT OR PRINCIPAL CONTRACTOR DETAILS**

Client:	SCOPE OF WORKS Provide a detailed description of the specific work being carried out (otherwise known as scope of works).
Project Name:	
Project Address:	
Project Manager:

Project Manager Signature:	
Date SWMS supplied to Project Manager:	

**ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT**

<input type="checkbox"/> involves a risk of a person falling more than 2 meters.	<input type="checkbox"/> is carried out on or near pressurised gas mains or piping.
<input type="checkbox"/> is carried out on a telecommunication tower.	<input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines.
<input type="checkbox"/> involves demolition of an element of a structure that is load-bearing.	<input type="checkbox"/> is carried out on or near energised electrical installations or services.
<input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure.	<input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere.
<input type="checkbox"/> involves, or is likely to involve, disturbing asbestos.	<input type="checkbox"/> involves tilt-up or precast concrete.
<input type="checkbox"/> involves structural alteration or repair that requires temporary supports to prevent collapse.	<input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor.
<input type="checkbox"/> is carried out in or near a confined space.	<input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant.
<input type="checkbox"/> is carried out in/near a shaft or trench deeper than 1.5m or tunnel involving use of explosives.	<input type="checkbox"/> is carried out in areas with artificial extremes of temperature.
<input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning.	<input type="checkbox"/> involves diving work.

**ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY**

<input type="checkbox"/> Forklift	<input type="checkbox"/> Crane/s	<input type="checkbox"/> Hoist/s	<input type="checkbox"/> Excavator	<input type="checkbox"/> Backhoe/Loader	<input type="checkbox"/> Boom Lift	<input type="checkbox"/> EWP	<input type="checkbox"/> Genie Lift
<input type="checkbox"/> Trencher	<input type="checkbox"/> Drilling Rig	<input type="checkbox"/> Trucks	<input type="checkbox"/> Formwork	<input type="checkbox"/> Bobcat	<input type="checkbox"/> Flammable Gas	<input type="checkbox"/> Fuel	<input type="checkbox"/> Dozer
<input type="checkbox"/> High Voltage	<input type="checkbox"/> Mulcher	<input type="checkbox"/> Tilt-up Panels	<input type="checkbox"/> Roller	<input type="checkbox"/> Scissor Lift	<input type="checkbox"/> Tractor	<input type="checkbox"/> Other -	

**RISK MATRIX**

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Elimination</b> Remove the hazard.
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Substitution</b> Replace the hazard.
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	<b>Isolation</b> Isolate People from the hazard
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	<b>Engineering</b> Isolate the hazard.
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	<b>Administrative</b> Change the work. <b>PPE</b>

**Notes on Hierarchy of Controls:** Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

**PERSONAL PROTECTIVE EQUIPMENT (PPE)**

FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE/FACE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

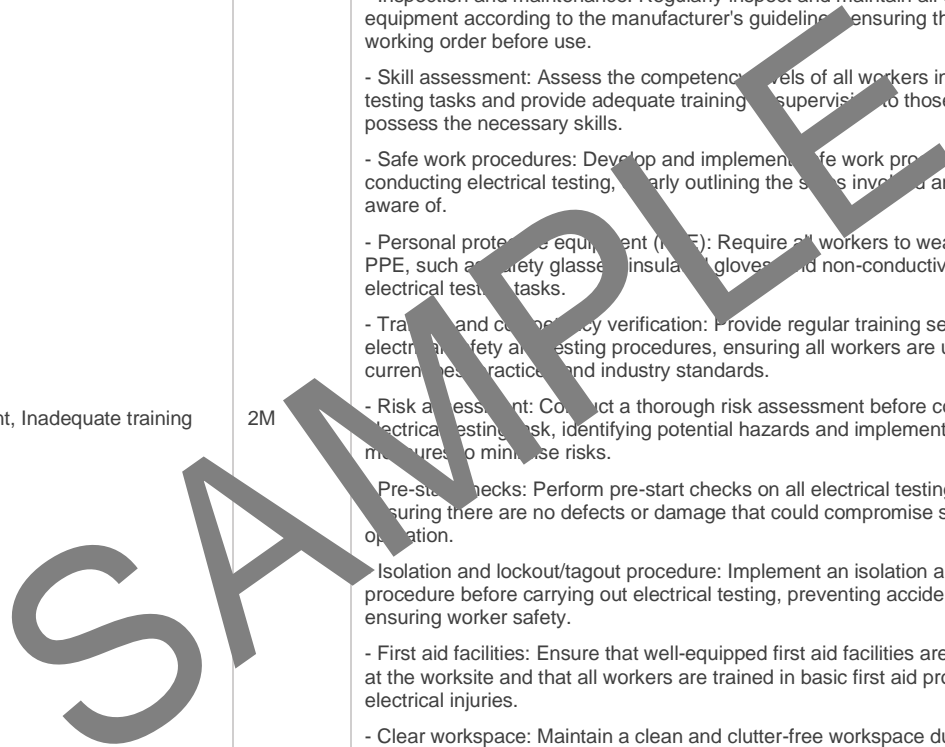

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Faulty equipment, Inadequate training	2M	<ul style="list-style-type: none"> <li>- Inspection and maintenance: Regularly inspect and maintain all electrical testing equipment according to the manufacturer's guidelines ensuring they are in good working order before use.</li> <li>- Skill assessment: Assess the competency levels of all workers involved in electrical testing tasks and provide adequate training and supervision to those who do not possess the necessary skills.</li> <li>- Safe work procedures: Develop and implement safe work procedures for conducting electrical testing, clearly outlining the steps involved and hazards to be aware of.</li> <li>- Personal protective equipment (PPE): Require all workers to wear appropriate PPE, such as safety glasses, insulation gloves and non-conductive footwear, during electrical testing tasks.</li> <li>- Training and competency verification: Provide regular training sessions on electrical safety and testing procedures, ensuring all workers are up-to-date with current best practices and industry standards.</li> <li>- Risk assessment: Conduct a thorough risk assessment before commencing any electrical testing task, identifying potential hazards and implementing suitable control measures to minimise risks.</li> <li>- Pre-start checks: Perform pre-start checks on all electrical testing equipment, ensuring there are no defects or damage that could compromise safety during operation.</li> <li>- Isolation and lockout/tagout procedure: Implement an isolation and lockout/tagout procedure before carrying out electrical testing, preventing accidental energising and ensuring worker safety.</li> <li>- First aid facilities: Ensure that well-equipped first aid facilities are readily available at the worksite and that all workers are trained in basic first aid procedures related to electrical injuries.</li> <li>- Clear workspace: Maintain a clean and clutter-free workspace during electrical testing activities, helping to reduce trip hazards and providing a safer environment for workers.</li> <li>- Incident reporting: Encourage an open culture of communication by requiring workers to promptly report any incidents, near misses, or safety concerns related to electrical testing, allowing for continuous improvement in workplace safety practices.</li> </ul>	1L	
2. Inspection	Electrical shock, Accidental start-up	3H	<ul style="list-style-type: none"> <li>- Proper isolation: Ensure all equipment is adequately isolated from electrical sources before commencing inspection. Follow lockout/tagout procedures to prevent accidental re-energising of the system being tested.</li> <li>- Use of insulated tools: Always utilise insulated tools and equipment when working with electrical systems to minimise the risk of electrical shock.</li> </ul>	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Inspection by a competent person: Only qualified and experienced personnel should perform electrical testing, as they possess the necessary knowledge and skills in electrical safety.</li> <li>- Risk assessment: Carry out a thorough risk assessment before commencing any electrical testing and take appropriate measures to minimise risks associated with electrical shock and accidental start-up.</li> <li>- Personal protective equipment (PPE): Workers must wear appropriate PPE, such as gloves, safety glasses, and non-conductive footwear, to reduce potential hazards of electrical shock during testing.</li> <li>- Clear signage: Clearly mark the work area with relevant warning signs indicating electrical hazards, restrict access to authorised personnel only, and lockout/tagout procedures are in place.</li> <li>- Visual inspections: Conduct a visual inspection of the equipment or system prior to electrical testing to identify any visible damage, loose connections, or other potential hazards.</li> <li>- Regular training: Ensure all workers receive regular refresher training on electrical safety procedures and PWS requirements, to increase awareness and minimise risks.</li> <li>- Use of multimeters and other safety equipment: Use appropriate testing instruments such as multimeters with the correct settings, and regularly maintain these tools for accurate readings and optimal performance.</li> <li>- Communication: Maintain clear communication lines between team members throughout the inspection process to ensure everyone is aware of ongoing tasks and potential hazards.</li> <li>- Permit-to-work system: Implementing a permit-to-work management system can help manage and monitor activities carried out at the workplace, ensuring that proper planning and risk assessment processes are followed before any electrical testing begins.</li> </ul>		
3. Test area set-up	Poor lighting, Tripping hazards	2M	<ul style="list-style-type: none"> <li>- Ensure adequate and evenly distributed lighting is provided in the test area, using task-specific portable lights when necessary.</li> <li>- Regularly inspect the work area for potential tripping hazards such as loose wires, cables, or stray equipment, and eliminate them promptly.</li> <li>- Clearly mark and define the testing area to segregate it from surrounding activity zones, preventing any unauthorised access.</li> <li>- Utilise high-visibility floor markings or safety tape to indicate potential tripping hazards, such as cords or cables running across walkways.</li> <li>- Install cable management systems like cable covers, cable trays or hooks to properly organise and secure electrical cords in the testing area and reduce trip hazards.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Regularly review and update risk assessments for the test area set-up and ensure that all staff are aware of the identified hazards and control measures implemented.</li> <li>- Conduct toolbox talks with workers involved in testing to discuss the possible hazards, including slips, trips, and falls, and how they can minimise the risks associated with these hazards.</li> <li>- Provide appropriate personal protective equipment (PPE) for workers involved in testing, such as non-slip shoes, gloves, and safety glasses to further reduce the risk of accidents.</li> <li>- Implement a reporting system that encourages workers to identify and report any new or existing hazards immediately.</li> <li>- Develop an emergency response plan for the test area, ensuring that all workers are familiar with the procedures to follow in case of an incident.</li> <li>- Keep the test area clean and free of debris, excess materials, or tools that may contribute to tripping hazards or other safety concerns.</li> <li>- Establish a regular maintenance schedule for inspection and servicing of equipment in the test area to ensure its safe functioning and to avoid any unforeseen incidents.</li> <li>- Train and educate all relevant employees on the safe handling and use of electrical testing equipment, ensuring they understand the potential hazards and are competent in implementing the necessary control measures to mitigate risks.</li> </ul>

**SIGNATORIES OF THE SAFE WORK METHOD STATEMENT**

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

**SAFE WORK METHOD STATEMENT MONITORING AND REVIEW**

**The SWMS must be reviewed regularly** to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

**The SWMS must be monitored regularly** for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

**SAFE WORK METHOD STATEMENT REVIEW CHECKLIST**

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.	<input type="checkbox"/>	<input type="checkbox"/>	
Names and signatures of all relevant personnel consulted during the development of the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input type="checkbox"/>	<input type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input type="checkbox"/>	<input type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Check control measures added to the SWMS are the most effective solutions.	<input type="checkbox"/>	<input type="checkbox"/>	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	<input type="checkbox"/>	<input type="checkbox"/>	
Permit requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS identifies plant and equipment to be used.	<input type="checkbox"/>	<input type="checkbox"/>	
Details of inspection checks required for any equipment listed are noted on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Describes any mandatory qualifications, experience, training, skills required to perform the work.	<input type="checkbox"/>	<input type="checkbox"/>	
Applicable personal protective equipment is selected on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Lists any required permits or licenses.	<input type="checkbox"/>	<input type="checkbox"/>	
Reflects and documents any legislative references and/or Australian Standards.	<input type="checkbox"/>	<input type="checkbox"/>	
Identifies any hazardous substances used with specific control measures in line with any SDS.	<input type="checkbox"/>	<input type="checkbox"/>
