THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PLOF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conducte proposed work starts.	cting a business or undertaking (HBU) is	required to ture at a safe work method s	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWMS well as review	vs and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	ALL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conduct of unical those hazards and then to further take steps to either charge or control eacy hazard.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must superately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON			
			- Ensure that all personnel handling hazardous substances have undergone adequate training, including identification and under and inder a noting of the specific hazards associated with each substance.					
			- Develop a comprehensive hazardous sub- nice inventory which includes details of each hazardous substance, their storage real rements and potential risks.					
			- Implement proper ventilation in all work area. The hazardous substances are being used or stored, to ensure that airborne columntrations do not exceed safe limits.					
			- Establish appropriate rage as as for each hazard to substance based on their respective classify arous a loom, tibility considerations.					
			- Provide an exaintain well perviced to charge a ventilation systems, including extraction fans and ductor a remove have abus fumes from workspaces efficiently.					
			- Implement a regularization and compliance schedule for ventilation equipment to ensure optimal be rmane and compliance with relevant Australian Standards.					
			- Regularly receive ventotion system design to address any changes in the workplan for which processes, so as to continuously uphold safe practices during the hazar hus materials.					
1. Preparation	Poor ventilation, Inadequate training	g 2M	2M	2M	2M	Enco workers to report any issues with ventilation systems, and promptly tend to any reported concerns.	1L	
			- Novide accessible Material Safety Data Sheets (MSDS) for all hazardous substances used in the workplace, and ensure workforce familiarity with interpreting the information provided.					
	5		 Conduct regular toolbox meetings with staff, focusing on updates related to safe handling procedures, Personal Protective Equipment (PPE) usage, and hazard communication. 					
			- Enforce the proper usage of PPE amongst workers who handle hazardous substances, in accordance with the MSDS recommendations and risk assessments.					
			 Periodically review and update internal guidelines and procedures for hazard communication, incorporating feedback from workers to ensure continuous improvement. 					
			 Monitor and regulate the amount of hazardous substances utilised at any given time, so as to minimise the possibility of over-exposure to harmful chemicals in case of accidental spills or leaks. 					
			 Establish effective monitoring and evaluation processes for hazardous substance handling, ensuring adherence to established safety protocols and promoting an environment of accountability amongst workers. 					
2. Storage	Improper container labeling, Spillage	3H		1L

3. Handling	Direct skin contact, Inhalation	ЗН	 Proper PPE: Ensure all workers are equipped with appropriate personal protective equipment, such as gloves, safety glasses, and resolutory protection, before handling any hazardous substances. Ventilation: Ensure sufficient ventilation is not adeque, portable entilation systems can be provided. Training: Provide training fonall workers on having hazardous substances safely, including understanding label SDS, and proper subage renormements. Emergency proceder on Estable, emergency response plans and train workers on how to respond use on ulls, laws or other incidents involving hazardous substances. Storate: Stoke azardous substances apperly using suitable containers, well-ventime cabine, and or designated areas away from ignition sources. Substances. Substance and classe of hazardous substances appropriately with information about incoments, have disposal: Arrange proper disposal methods for hazardous waste oducts to prevent environmental contamination. Haza, the waste disposal: Arrange proper disposal methods for hazardous waste oducts to prevent environmental contamination. Spill kli Planespill klis and response equipment nearby for immediate use in case to address by providing tools, equipment, and techniques that reduce direct contact. First aid: Maintain fully stocked first aid kits in the workplace and train workers in basic first aid procedures related to hazardous substance exposure. Encourage good hygiene practices: Advise workers to wash their hands thoroughly after handling hazardous substances and before breaks/eating to minimise skin exposure. Periodic inspections: Conduct regular inspections to ensure that control measures are implemented effectively and consistently. Report incidents: Create a system for reporting any incidents or near-misses involving hazardous substances so that lessons can be learned and improvements made to future handling practices. 	2М

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAF WC A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to review the sure it remains revised if necessary) if relevant control measure are a conconsultation with workers (including contractors are subcontract of the SWMS and their health and safety representatives who re workplace.

ke sure it remains effective and must be reviewed (and are subcontractions) who may be affected by the operation sentatives who received that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWN			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting sections.			
Responsible person is assigned and listed on the SWMS for the imement of cont, measures.			
Permit requirements specified, such as Hot Wey, Electrical Work, Verat Heights etc.			
SWMS identifies plant and equipment to be up t.			
Details of inspection checks required for any equipment listed approved on the SWMS.			
Describes any mandatory qualifications, experience vaining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
