

Hydraulic Notcher	SAFE WORK METHOD ST	ATEMENT (SWMS)								
TASK OR ACTIVITY: Hydraulic Notcher										
Business Name: [Company Name]		ABN: [ABN]	SWMS#							
Business Address: [Company Address]										
Contact Person:	Phone: [Phone]	E fil:								
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE POST THE PROJECT								
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (r 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before							
Full Name:										
Signature:		Title:	Date:							
Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, well as reviews and modifications of the SWMS.										
Full Name:		Title:	Phone:							
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND							
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions those hazards and then to further take steps to either the conditions of the conditions are or conditional talks.	NAME	SIGNATURE	DATE							
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.										
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.										
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips and falls, working near moving machinery	2M	<ul> <li>Perform a thorough workplace inspection before starting work, identifying any potential slip, trip or fall hazards and ensuring that the care eliminated or minimised.</li> <li>Clearly mark the designated work area for the cydraulic Notcher with visible barriers, such as warning tape, traffic cone or a signage to keep unauthorised personnel at a safe distance from moving motinery.</li> <li>Keep the working area clean and well-organis. The requently removing waste materials, debris, or any other obstructions that the lid pose a shifting or tripping hazard.</li> <li>Ensure all workers are paring a propriate personal protective equipment (PPE), including non-slip of twee abloves and safety glasses when in proximity to the Hydraulic Not ber.</li> <li>Provide regular maintenance and inspector of the Hydraulic Notcher to minimise risks to ciate to the ununctioning equipment, such as unexpected machinery movers, and or unto colled release of stored energy.</li> <li>Establish are composited in protocols among workers to coordinate operations, advise of uponing activities, and promptly report any hazardous conditions within a work rea.</li> <li>Improve a sufficient lighting in the work area to ensure all workers can clearly see and navors around potential hazards and operating machinery.</li> <li>In and educate employees on the proper use and operation of the Hydraulic Nocher, as well as the specific hazards and risks associated with its use, including how to recognise and avoid potential slips, trips, and falls.</li> <li>Post clear, easily readable warning signs around the work area to alert workers of potential hazards related to the Hydraulic Notcher operations and nearby moving machinery.</li> <li>Develop and enforce a consistent housekeeping schedule to maintain cleanliness and organisation within the work area, reducing the likelihood of risks associated with cluttered or obstructed walkways, slippery surfaces, and loose materials or cables.</li> </ul>	1L	
2. Inspection	Machinery malfunction, pinch points	2M	<ul> <li>Regular maintenance and servicing: Ensure the hydraulic notcher undergoes routine maintenance and servicing by qualified technicians to keep it in optimal working condition.</li> <li>Check for visible defects: Before starting any work, visually inspect the hydraulic notcher for any signs of damage or wear that may lead to malfunction during operation.</li> <li>Follow manufacturer's guidelines: Always adhere to the manufacturer's recommended operating procedures and safety measures when using the hydraulic notcher.</li> </ul>	1L

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul> <li>Implement Lockout/Tagout procedures: Utilise a lockout/tagout system to shut down and secure the equipment from accidental activation while performing any inspection or maintenance.</li> <li>Clear access to machinery: Keep the area are not the hydraulic notcher clear of debris and obstructions to ensure safe accessory or workers while conducting inspections and maintenance.</li> <li>Use proper tools and equipment: Only use as and and specific tools for inspecting and maintaining the hydraulic notcher or indicated by the manufacturer's guidelines.</li> <li>Wear appropriate the safe as a processory of the equipment (Processory PPE and as a processory of the necessary of the processory of the necessory of the necessary of the necessary of the processory of the necessary of the processor of the processor of the necessary of the necessory of th</li></ul>		
3. Power-up	Electric shock, pinch points	зН	Regular Inspection and Maintenance: Ensure that the hydraulic notcher is regularly inspected for any signs of damages, frayed wires or loose connections that can result in electric shock.      Mandatory Training: Provide necessary training to employees working with the hydraulic notcher on safe handling, correct use, and operating procedures to minimise the risk of accidents.	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Emergency Shutdown Procedure: Develop and implement an emergency shutdown procedure in case of any malfunctions or hazards that occur while using the hydraulic notcher.		
			- Personal Protective Equipment (PPE): Make andatory for operators to wear appropriate PPE like gloves, safety glasses and protective footwear to reduce the risk of injuries from pinch points and electric pazards		
			- Lockout/Tagout Procedure: Implement a lock gout procedure for the hydraulic notcher to ensure that any maintenance work do on the mache is carried out safely without exposure to electrical hazards.		
			- Proper Grounding: that it hydraulic notcher properly grounded to prevent any possible electric shock azard.  - Use of Make e Guards: I sure that I moved parts such as gears, conveyors,		
			belts, and other inch poins are proper parded to minimise the risk of injury.		
			- Sign s, and Averages: Place hazard warning signs around the hydraulic notches a rkspace of make workers aware of potential hazards associated with its operation.		
			Adeque Wo Space Ensure there is sufficient space around the hydraulic her freezy neuverability and access, helping prevent accidental contact with pinc. bit and electrical components.		
			(erified perating Procedures: Establish standard operating procedures (SOPs) to owering up the hydraulic notcher, including step-by-step instructions, responsibilities, and precautions.		
			- Reporting and Monitoring: Encourage team members to report any incidents, near misses, or potential hazards related to the hydraulic notcher's operations. Regularly review the reports and update your SWMS as required to improve workplace health and safety.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

		SAF WC A	STATEMENT	MONITORING AND	REVIEW		
The SWMS must be reviewed regularly to reak e sure it remains effective and must be reviewed (and revised if necessary) if relevant control measure are subcontracters and subcontracters and subcontracters) who may be affected by the operation of the SWMS and their health and safety representatives who redesented that work group at the workplace.  When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.			The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:  1. Spot Checks. 2. Consultation with workers, contractors and sub-contractors. 3. Internal audits on a continual basis.  An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.						
ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS			
The company details have been entered, including the project name and address.						
Names and signatures of all relevant personnel consulted during the development of the SWMS.		D				
Name, signature, position and date signed of the person approving the SWMS.						
Specific personnel and qualifications, experience is noted in the SWMS.	P					
Provides a step-by-step process of tasks required to carry out the activity or task.						
Adequate risk assessment of any identified hazards has been completed.						
Foreseeable hazards are identified and documented for each step.						
Any hazards listed in any site risk assessments have been added to the SWN						
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.						
Check control measures added to the SWMS are the most effecting sections.						
Responsible person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person person is assigned and listed on the SWMS for the imperent person per
