

**Juicer | SAFE WORK METHOD STATEMENT (SWMS)**

**TASK OR ACTIVITY: Juicer**

Business Name: [Company Name] ABN: [ABN] SWMS#

Business Address: [Company Address]

Contact Person: Phone: [Phone] Email:

**THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PROJECT MANAGER OF THE PROJECT**

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature: Title: Date:

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name: Title: Phone:

**ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED** NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

	NAME	SIGNATURE	DATE
Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.			
If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.			

**CLIENT OR PRINCIPAL CONTRACTOR DETAILS**

Client:	SCOPE OF WORKS Provide a detailed description of the specific work being carried out (otherwise known as scope of works).
Project Name:	
Project Address:	
Project Manager:	
Contact Phone:	
Project Manager Signature:	
Date SWMS supplied to Project Manager:	

**ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT**

<input type="checkbox"/> involves a risk of a person falling more than 2 meters.	<input type="checkbox"/> is carried out on or near pressurised gas mains or piping.
<input type="checkbox"/> is carried out on a telecommunication tower.	<input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines.
<input type="checkbox"/> involves demolition of an element of a structure that is load-bearing.	<input type="checkbox"/> is carried out on or near energised electrical installations or services.
<input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure.	<input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere.
<input type="checkbox"/> involves, or is likely to involve, disturbing asbestos.	<input type="checkbox"/> involves tilt-up or precast concrete.
<input type="checkbox"/> involves structural alteration or repair that requires temporary supports to prevent collapse.	<input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor.
<input type="checkbox"/> is carried out in or near a confined space.	<input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant.
<input type="checkbox"/> is carried out in/near a shaft or trench deeper than 1.5m or tunnel involving use of explosives.	<input type="checkbox"/> is carried out in areas with artificial extremes of temperature.
<input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning.	<input type="checkbox"/> involves diving work.

**ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY**

<input type="checkbox"/> Forklift	<input type="checkbox"/> Crane/s	<input type="checkbox"/> Hoist/s	<input type="checkbox"/> Excavator	<input type="checkbox"/> Backhoe/Loader	<input type="checkbox"/> Boom Lift	<input type="checkbox"/> EWP	<input type="checkbox"/> Genie Lift
<input type="checkbox"/> Trencher	<input type="checkbox"/> Drilling Rig	<input type="checkbox"/> Trucks	<input type="checkbox"/> Formwork	<input type="checkbox"/> Bobcat	<input type="checkbox"/> Flammable Gas	<input type="checkbox"/> Fuel	<input type="checkbox"/> Dozer
<input type="checkbox"/> High Voltage	<input type="checkbox"/> Mulcher	<input type="checkbox"/> Tilt-up Panels	<input type="checkbox"/> Roller	<input type="checkbox"/> Scissor Lift	<input type="checkbox"/> Tractor	<input type="checkbox"/> Other -	

**RISK MATRIX**

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Elimination</b> Remove the hazard.
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Substitution</b> Replace the hazard.
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	<b>Isolation</b> Isolate People from the hazard
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	<b>Engineering</b> Isolate the hazard.
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	<b>Administrative</b> Change the work. <b>PPE</b>

**Notes on Hierarchy of Controls:** Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

**PERSONAL PROTECTIVE EQUIPMENT (PPE)**

FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE/FACE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

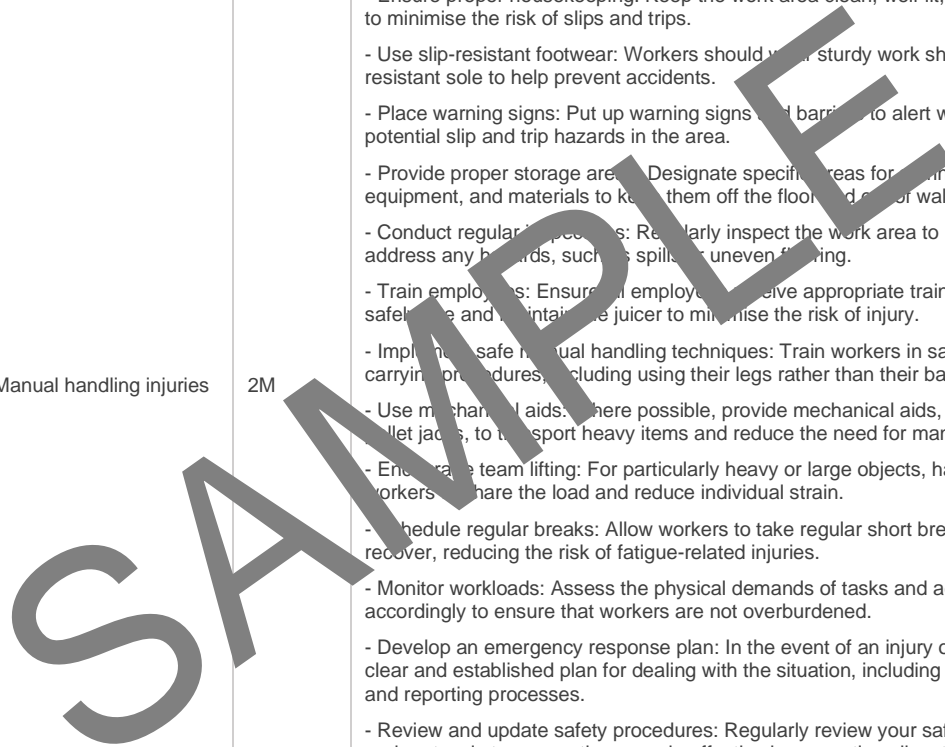

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips and trips, Manual handling injuries	2M	<ul style="list-style-type: none"> <li>- Ensure proper housekeeping: Keep the work area clean, well-lit, and free of clutter to minimise the risk of slips and trips.</li> <li>- Use slip-resistant footwear: Workers should wear sturdy work shoes with a slip-resistant sole to help prevent accidents.</li> <li>- Place warning signs: Put up warning signs and barriers to alert workers to any potential slip and trip hazards in the area.</li> <li>- Provide proper storage areas: Designate specific areas for storing tools, equipment, and materials to keep them off the floor and clear of walking paths.</li> <li>- Conduct regular inspections: Regularly inspect the work area to identify and address any hazards, such as spills or uneven flooring.</li> <li>- Train employees: Ensure all employees receive appropriate training on how to safely use and maintain the juicer to minimise the risk of injury.</li> <li>- Implement safe manual handling techniques: Train workers in safe lifting and carrying procedures, including using their legs rather than their back to lift objects.</li> <li>- Use mechanical aids: Where possible, provide mechanical aids, such as trolleys or pallet jacks, to transport heavy items and reduce the need for manual handling.</li> <li>- Encourage team lifting: For particularly heavy or large objects, have multiple workers share the load and reduce individual strain.</li> <li>- Schedule regular breaks: Allow workers to take regular short breaks to rest and recover, reducing the risk of fatigue-related injuries.</li> <li>- Monitor workloads: Assess the physical demands of tasks and adjust workloads accordingly to ensure that workers are not overburdened.</li> <li>- Develop an emergency response plan: In the event of an injury or accident, have a clear and established plan for dealing with the situation, including first aid measures and reporting processes.</li> <li>- Review and update safety procedures: Regularly review your safety procedures and protocols to ensure they remain effective in preventing slips, trips, and manual handling injuries. Update them as necessary based on changes in the work environment or advancements in safety equipment and best practices.</li> </ul>	1L	
2. Cleaning	Chemical exposure, Electric shock	2M	<ul style="list-style-type: none"> <li>- Proper Training: Ensure that all workers involved in the cleaning process are adequately trained in handling and using cleaning chemicals, equipment, and understanding potential hazards.</li> <li>- Personal Protective Equipment (PPE): Workers should wear appropriate PPE, such as gloves, goggles or safety glasses, aprons, and closed-toe shoes to minimise exposure to harmful chemicals.</li> <li>- Material Safety Data Sheets (MSDS): Keep MSDS readily available on-site for all cleaning chemicals used, containing information about the properties of the substances, their hazards and safety precautions to take.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Storage and disposal of chemicals: Store chemicals in a well-ventilated area, away from heat sources, and electrical equipment. Dispose of empty containers, used rags, and other cleaning materials according to local regulations.</li> <li>- Electrical safety checks: Before starting the cleaning process, make sure all electrical equipment is turned off and unplugged. Check for any visible damage to cables or plugs that may pose a risk for electric shocks.</li> <li>- Use of non-conductive tools: Utilise non-conductive cleaning tools such as plastic or rubber scrapers, squeegees, and brushes to reduce the risk of electrical shock during cleaning.</li> <li>- Ground Fault Circuit Interrupter (GFCI): Install GFCIs to protect circuits, especially in wet or damp areas where the juicer or power outlets are located, reducing the risk of electrical shock.</li> <li>- Adequate lighting: Ensure there is sufficient lighting in the workspace to allow workers to clean the juicer equipment, surfaces, and floor areas they are cleaning, minimising accidents.</li> <li>- Proper ventilation: Make sure the workplace is adequately ventilated to prevent chemical vapours from becoming concentrated, which can cause health problems.</li> <li>- Spill containment: Implement spill-containment measures, such as having absorbent materials and spill kits handy in case of a chemical spill or leak.</li> <li>- Clear communication between workers: Ensure that all workers are aware of each other's actions and whereabouts during the cleaning process in case an emergency situation arises.</li> <li>- First-aid recommendation: Have first-aid kits, eyewash stations, and appropriate first-aid procedures readily available in case of accidental chemical exposure or electric shock incidents.</li> <li>- Regular inspection and maintenance: Conduct regular inspections and maintenance of electrical connections, cables, and equipment to ensure that safety requirements are met and any hazards are dealt with promptly.</li> </ul>		
3. Setup	Falls from height, Caught in/between equipment	3H	<ul style="list-style-type: none"> <li>- Proper training: Ensure all workers involved in the setup process have been adequately trained on the safe and correct methods of assembling and operating the juicer.</li> <li>- Use of PPE: Workers should be provided with and required to wear appropriate Personal Protective Equipment (PPE), such as safety shoes, gloves, hard hats, and safety glasses.</li> <li>- Inspection of equipment: Before starting the setup process, inspect the juicer and any associated equipment for signs of damage, wear and tear, or potential malfunctions. Address any issues before proceeding.</li> <li>- Safe lifting techniques: Train workers on proper lifting techniques to minimise the risk of injury when moving or positioning heavy components of the juicer.</li> </ul>	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Work area clearance: Ensure the workspace is clear of any obstructions or hazards that may result in falls or workers becoming caught between the equipment.</li> <li>- Ladder safety: If ladders are necessary for reaching elevated sections during setup, ensure they are stable, secure, and have non-slip surfaces. Workers should also maintain a three-point contact when working on ladders.</li> <li>- Secure footing: Encourage workers to maintain proper footing when handling machinery, using anti-slip mats or covers when necessary to reduce the risk of falls.</li> <li>- Communication protocols: Establish clear communication protocols among workers to prevent misunderstandings or errors that may lead to accidents during the setup process.</li> <li>- Lockout/Tagout procedure: Implement lockout/tagout procedures to prevent inadvertent activation of the juicer system when it is being set up.</li> <li>- Guardrails and barriers: Where applicable, install guardrails or barriers around elevated working areas and open edges to protect workers from falls.</li> <li>- Proper tool usage: Ensure workers use appropriate tools during the setup process and are trained in their safe and effective use.</li> <li>- Emergency stop devices: Equip the juicer with emergency stop devices in easy-to-reach locations in case of sudden malfunctions or incidents that require immediate shutdown.</li> <li>- Buddy system: Pair workers together during the setup process to provide an additional level of safety and support, especially when working at height or handling heavy equipment.</li> <li>- Regular breaks: Encourage workers to take regular breaks and avoid fatigue during the setup process. This can minimise the risk of human error and potential accidents.</li> </ul>		
4. Inspection	Working at heights, Falling objects	3H	<p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p>	2M

**SIGNATORIES OF THE SAFE WORK METHOD STATEMENT**

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

**SAFE WORK METHOD STATEMENT MONITORING AND REVIEW**

**The SWMS must be reviewed regularly** to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

**The SWMS must be monitored regularly** for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

**SAFE WORK METHOD STATEMENT REVIEW CHECKLIST**

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.	<input type="checkbox"/>	<input type="checkbox"/>	
Names and signatures of all relevant personnel consulted during the development of the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>
