

Knives and Cutters Indu	strial SAFE WORK METH	OD STATEMENT (SWMS)	
TASK O	R ACTIVITY: Knives and Cutters	Industrial	
Business Name: [Company Name]		ABN: [ABN]	SWMS#
Business Address: [Company Address]			
Contact Person:	Phone: [Phone]	E fil:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE POST THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (N 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE B PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched and in accordance with regislative requirements to first identify any site hazards, conditions inical those hazards and then to further take steps to either the conditions of the co	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must steam ately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Incorrect usage, Unsecured work area	3H	 Provide comprehensive training on the proper usage of knives and cutters in an industrial setting, ensuring workers understand the rices and are aware of the precautionary measures. Conduct a thorough inspection of the work weap rior to commencement of work, identifying potential hazards and securing as cloose obites or equipment that could pose a risk to workers. Ensure all knives and cutters are sharp, in good porking condition and appropriate for the task at hand. Dull blade ocan lead to increased forces equired, risking injury or loss of control. Implement a chapprotoco for strong and handling knives and cutters when not in use, including esignated strange as as with equate organisational tools such as holders and hois. Cleft or pommunations designated work zones for tasks involving knives and cutter in thatainin expropriate distances between workers to minimise the risk of accide is. Establing cle lines of communication between workers, encouraging them to noort are unsact conditions or concerns immediately. Eince that cutting tasks are performed on stable, non-slip surfaces to minimise novement and promote accurate cuts while reducing the likelihood of accidents. Sovide workers with suitable personal protective equipment (PPE), such as cutressitant gloves, long-sleeve shirts, and safety goggles to mitigate potential injuries from accidents. Implement a buddy system, where possible, during tasks involving the use of knives and cutters, so workers can ensure each other's safety and adherence to best practices. When carrying out cutting tasks, encourage workers to keep their free hand away from the cutting edge and maintain a firm grip on the handle or tool being used. Encourage regular breaks to help reduce fatigue, which may contribute to poor judgement or loss of focus, increasing the risk of accidents. Review and update Safe Work Method Statements (SWMS) regularly, incorporating new learnings and a	2M	
2. Blade Selection	Inappropriate blade, Incorrect installation	3H	 Ensure the blade selected is suitable for the specific cutting task, material type and requirements of the job. Familiarise yourself with the manufacturer's guidelines regarding recommended blades for particular tools and applications. Verify all blades are compliant with Australian safety standards and have appropriate certification. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Inspect the blade condition, checking for any damage, cracks or deformities that could compromise its performance or safety.		
			- For tasks that require different types of cuts, choose versatile blades with the ability to be used for multiple functions without change constantly.		
			- Set up a proper storage system for blades organising the n based on their compatibility with corresponding tools and more rials		
			- Prioritise using safety or self-retracting knives unimise the rink of injury while handling and installing blade		
			- Train staff members on the counct installation products for various blades, as well as the import to the condition before use.		
			- Implement — ool mainten — be sch — tle that — sludes regular checks and replacement — vorn or da — aged blac		
			- End the open confunction within the team, providing workers with an avenue to report the ocens out blade suitability, installation processes or other potential hazard record to cong tasks.		
			egular consect thorough visual inspections of the equipment, including checking for sit is of wear and tear or damage to all components such as handles, blades, locks.		
			aplement a preventative maintenance schedule for the knives and cutters, including routine cleaning, lubrication, and sharpening according to the manufacturer's recommendations.		
			- Ensure that only qualified and trained personnel are responsible for inspecting, maintaining, and operating the industrial knives and cutters.	1L	
			- Establish a reporting system for workers to promptly communicate any concerns or issues with the equipment so they can be addressed before accidents occur.		
3. Equipment Inspection	Faulty equipment, Damageo siade	2M	- Clearly label all knives and cutters with relevant safety information, warnings, and usage instructions to remind users of the potential hazards and proper handling techniques.		
			- Provide appropriate personal protective equipment (PPE), such as cut-resistant gloves and safety goggles, for all workers who are required to use or handle industrial knives and cutters.		
			- Store all industrial knives and cutters securely in designated areas when not in use to prevent unauthorised access and minimise the risk of accidental injury.		
			- Develop comprehensive training programs for employees on the safe usage, inspection, and maintenance procedures for industrial knives and cutters - with regular refresher courses scheduled.		
			- Dispose of damaged blades following proper disposal procedure ensuring compliance with environmental regulations and guidelines. Replace damaged blades promptly to avoid using faulty equipment.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

		SAF WO A S	THUD STATEMENT	MONITORING AND	REVIEW			
The SWMS must be reviewed regularly to pake sure it remains effective and must be reviewed (and revised if necessary) if relevant control measure are subcontracted, are review by process should be carried out in consultation with workers (including contractors are subcontracted) who may be affected by the operation of the SWMS and their health and safety representatives who resented that work group at the workplace. When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist				The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to: 1. Spot Checks. 2. Consultation with workers, contractors and sub-contractors. 3. Internal audits on a continual basis. An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures				
them to understand and implement the revised SWMS. that the PCBU is consistently developing ever-improving systems of safe work principles.
