THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE POST THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (N 3U) is	required to ture at a safe work method s	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE B PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions inical those hazards and then to further take steps to either the conditions of the cond	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must steam attely. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Debris on ground, overhead power lines	2M	- Thorough inspection: Before starting the mowing task, conduct a comprehensive site inspection to identify any potential hazards such of debris on the ground, overhead power lines, or other obstructions. - Site cleanup: Remove any debris, loose at serials, or objects from the ground to prevent them from getting caught in the money blades of dusing damage to the equipment. - Power line assessment: Determine the height and distance of the behald power lines from the work area and or sure there is adequited a clean deforther ride-on motor mower. - Use proper significated and a current of the work area with appropriate signs and barriers to end that unan oriseous resonner of kept at a safe distance. - Awardness the ing: Preduce employed and necessary training about potential hazard related wild on motor mowers and the control measures they should follow being the predaction at motor mowers and the control measures they should follow being the predaction stage. - PPE Inguit ment: But ip all workers with essential Personal Protective Equipment (PPE), Instudio safety, nots, gloves, eye protection, high-visibility clothing, and parring betch. - Predaction with the predactions of the working condition and all safety guards at devices are securely in place. - Veather considerations: Check the weather conditions before commencing work, and reschedule tasks in case of heavy rain or strong winds that could cause debris accumulation or unstable ground conditions. - Safe work procedures: Develop and follow specific Safe Work Method Statements (SWMS) during this work step, discussing them with workers and ensuring they understand their responsibilities. - Tree trimming: If necessary, trim tree branches and vegetation around the work area to minimise contact with overhead power lines and reduce the risk of electrocution. - Monitor surface conditions: Continuously monitor ground conditions while mowing, adjusting speed and operation accordingly to maintain control of the ride-on motor mower. - Emergency response pla	1L	
2. Pre-start checks	Damaged equipment, incorrect fluid levels	2M	- Conduct a thorough visual inspection of the motor mower and its components, checking for any signs of damage, wear, or deterioration. - Check all safety devices, such as safety guards and kill switches, to ensure they are intact and functioning correctly.	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Inspect belts, chains, and cables for any signs of fraying, damage, or excessive wear. Replace if necessary.		
			- Examine all hoses and connections for leaks or charges, paying close attention to hydraulic lines and fluid levels.		
			- Verify that all fluid levels (oil, coolant, brandfuid) are with the manufacturer's recommended range. Top up if required.		
			- Check tyre pressure and condition, ensuring to the ney do not show any signs of damage, punctures, or excelling wear.		
			- Inspect the mower blades for mage or excessive . Sharpen or replace if necessary.		
			- Ensure that control level and living are proper working order and free from obstruction.		
			- Che e fuel at a fill up the tank, ensuring that no contaminants or debris are in to ed in the process.		
		- Test a light indicates, and warning signals on the motor mower to ensure they are functioning operection.			
			- psult be operior's manual for any specific pre-start checks required for the specific pre-start pre-s		
			ocument all pre-start check findings on a checklist or logbook, addressing any it tified issues before using the equipment.		
			Hold a toolbox talk with all operators, discussing the importance of conducting prestart checks, procedures to follow, and hazards to be aware of.		
			- Establish a routine maintenance schedule for the motor mower, including regular servicing and inspections to promote the longevity and safe operation of the		
			equipment.		
			- Proper Training: Ensure that all operators using the mower are trained in its safe operation, including how to start and stop the mower, engage and disengage cutting mechanisms, steer, park, and troubleshoot any issues.		
			- Protective Equipment: Provide appropriate personal protective equipment (PPE) for		
3. Start mower	3. Start mower Exposure to noise, improper operation technique	2M	operators, including earmuffs or earplugs to reduce exposure to excessive noise, safety goggles to protect against flying debris, and gloves to minimise contact injuries.	1L	
			- Routine Maintenance: Conduct regular inspections and maintenance on the motor mower to ensure it is in good working order and safe to use. Maintain a maintenance log and follow the guidelines provided by the manufacturer.		
			- Pre-Start Checklist: Develop and implement a pre-start inspection checklist that includes checking all safety features, fluid levels, tyre pressure, and function of the ignition system before starting the mower.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Starting Operations: Instruct operators to start the mower only when they are seated properly and all controls are neutral. Ensure the parking brake is engaged before starting the engine.		
			- Mowing Techniques: Train operators on proportion of the terrain, following the risk of overturning, like driving at an appropriate speed for the terrain, following the contours of the landscape, and avoiding stee slopes. The turns, or sudden changes in terrain where possible.		
			- Hazardous Areas: Identify and flag hazardous as in the mount area, such as steep slopes, water bodies, a postacles that may require autional safety precautions or techniques to sall y navigate.		
			- Emergency Story roceo : Info operators about the emergency stop procedures to me mower, sluding w to grow shut down the engine, disengage the cutting me anism, an apply the sale of case of an emergency or malfunction.		
			- End Cab tick reasible, consider providing an enclosed cab option for the mowe of other providing excessive noise exposure, flying debris, and inclement at ather conditions.		
			- Noise pmn pication uplement a system for communication between operators necess by, so has using hand signals, radios, or visual indicators to facilitate clear and fficing the communication without excessive shouting or noise exposure.		
			Proper rage: Instruct operators on the proper storage of the mower when not in a meaning parked on a flat surface with the parking brake engaged, cutting in chanism disengaged, and keys removed to prevent unauthorised and unsafe operation.		
			- Continuous Improvement: Periodically review and update safety procedures, training materials, maintenance practices, and control measures based on feedback from operators, observations of work processes, and changes in the mower equipment, ensuring that safety remains a priority within your workplace.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

	SAF WO A STHED STATEMENT MONITORING AND REVIEW							
The SWMS must be reviewed regularly to refer to the sure it remains effective and must be reviewed (and revised if necessary) if relevant control measure are a constructively process should be carried out in consultation with workers (including contractors are subcontracted by the operation of the SWMS and their health and safety representatives who reduces that work group at the workplace. When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.				The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to: 1. Spot Checks. 2. Consultation with workers, contractors and sub-contractors. 3. Internal audits on a continual basis. An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
