

Order Picker Forklift SAFE WORK METHOD STATEMENT (SWMS)											
TAS	TASK OR ACTIVITY: Order Picker Forklift										
Business Name: [Company Name]		ABN: [ABN]	SWMS#								
Business Address: [Company Address]											
Contact Person:	Phone: [Phone]	E gil:									
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PL OF THE PROJECT									
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (I 3U) is	required to thurs at a safe work method s	tatement (SWMS) is prepared before								
Full Name:											
Signature:		Title:	Date:								
Details of the person(s) responsible for ensuring implementation, monitoring a	compliance of the SWMS, well as review	s and modifications of the SWMS.									
Full Name:		Title:	Phone:								
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED		LL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND								
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conduct or unical those hazards and then to further take steps to either conduct or contained an hazard.	NAME	SIGNATURE	DATE								
If an incident or a near miss occurs, all work must structure unately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.											
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.											
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Struck by moving vehicle, Injuries from pre-use checks	ЗН	 Establish a safety exclusion zone around the work area to prevent unauthorised access and potential accidents with moving vehicles Install warning signs and barriers to further reference the safety exclusion zone and caution others of the ongoing operation. Ensure that all operators are adequately traced and use versalid licenses to operate an Order Picker Forklift. Implement a daily pre-use the ection routine, where any potential issues or defects in the forklift are reported and wrified immediately. Keep the operation of the vision and the prescription of the prescription of the spills, clutter, or debris. Use high vision version and all times. Regular breaks of update the Safe Working Method Statement (SWMS) to include rew otential azards and safety procedures. Encounge of an and ustant communication within the team, especially when the highlift is beratural. Inclusion mum up activities or stretches before commencing work to reduce the risk f physicular press. Maintain good lighting conditions in the workspace to ensure clear visibility at all times. Ensure that loads on the forklift are well-balanced and securely fastened to prevent any falling objects during operation. 	2M	
2. Pre-Operation Inspection	Forklift falls whilst elevated, Unexpected starting of machine	4A	 Conduct pre-operational checks of the forklift including: tyres, brakes, steering, controls, warning devices, mast and reach mechanism, safety switch, guard, attachment and lift chain. Make sure the forklift is not defective at any point before use. Any defects should be immediately reported to the supervisor, tagged as 'out of service', and not used until it is safe to operate. Always perform a visual assessment of the surrounding environment before operating the forklift. Look out for obstructions, uneven surfaces and other potential hazards that might cause the machine to tip or fall. Ensure that all workers are properly trained in the operation of an order picker forklift, including correct use and awareness of risk and safety procedures. 	ЗH	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- All operators should implement the unexpected start procedure (check if the area is clear, sound horn/start-up alarm) before starting the machine.		
			- Use maintenance logs and checklists to monitor precurring issues or anomalies that could contribute to unexpected starts or fat		
			- Enforce mandatory use of safety harness and other projective gear such as helmets and gloves while operating the order other provide result.		
			- Regularly review and update the Safe Work Mood Statement (SWMS) and safety procedures to ensure they are current, contract ensure and effectively communicated to all workers.		
			- Ensure that the recently semen oncy stop function to working correctly and that all operators know ow to use		
			- Install measures to prevent unauthol, active of the order picker forklift, such as key could system sort this to prevent accidental or improper use.		
			- Consider onduce a regular toolbox talks to raise awareness about warehouse hazard respectively. Se associated with the use of machinery like order picker forklifts.		
	7		- We kers hould veceive an appropriate level of training on how to safely mount and dismole from the order picker forklift.		
			ake sure the forklift is completely stationary before attempting to mount or dispount.		
			If required, use three points of contact (one hand and two feet, or two hands and one foot) when mounting/dismounting the picker.		
			- Always face towards the equipment when climbing up or down, never jump or rush.		
			- Check that the entry/exit routes are clear of tripping hazards before proceeding.		
3. Mounting and Dismounting	Slips, trips and falls, Inju- improper mounting/dismourning	4A	- Workers should always wear suitable footwear with good grip to minimise slipping hazard.	2M	
2 lotto unung	in proportional and gradenical and g		- Install suitable safety handles and non-slip tread on the steps of the order picker forklift.		
			- Regular maintenance checks should be carried out to ensure safety features are functioning correctly.		
			- The work area should be sufficiently lit to prevent accidents related to poor visibility.		
			- Alert all workers operating in immediate vicinity about the imminent operation of the forklift.		
			- Procedures should be in place to cope with any emergencies resulting from slips, trips, falls or injuries from improper mounting/dismounting from the order picker forklift.

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAF WO A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to revised if necessary) if relevant control measure are revised if necessary) if relevant control measure are revised of the SWMS and their health and safety representatives who reworkplace.

ke sure it remains effective and must be reviewed (and are subcontractions) who may be affected by the operation sentatives who received that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWN			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effectine sections.			
Responsible person is assigned and listed on the SWMS for the impement of continue measures.			
Permit requirements specified, such as Hot Wree, Electrical Work, Versat Heights etc.			
SWMS identifies plant and equipment to be upd.			
Details of inspection checks required for any equipment listed ar noted on the SWMS.			
Describes any mandatory qualifications, experience reining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
