THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE POST THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (r SU) is	required to ture at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	compliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE B PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with agislative requirements to first identify any site hazards, conditions those hazards and then to further take steps to either the conditions are or conditions.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must structurately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips, and falls, Manual handling injuries	2M	Conduct a thorough risk assessment and site inspection before commencing any outdoor work to identify potential hazards such as under ground, obstructions, or slippery surfaces. Clearly mark any identified hazards with a copriate signage, barrier tape, or temporary fencing to prevent access and ran awarence among workers. Provide appropriate personal protective equipers (PPE) for all employees, including slip-resistant footwear, gloves for mane thandling target, and high-visibility clothing to make them easily wible to others. Implement proper has beeping paractices to ensure at the work area is kept clean and free for a debris material or other trip hazards throughout the duration of the job. Ensure staff to give advantate training continual handling techniques to minimise the rine kinjury with assks such as lifting, carrying, pushing, or pulling heavy loads. Encol age imploye at ouse mechanical aids or seek assistance from team member who perform a manual handling activities to reduce the likelihood of airry. Register review weather conditions to make informed decisions about whether it is lafe to a mue working outdoors, especially during periods of heavy rain, extreme apperatures, or strong wind, which may increase the risk of slips and manual handling injuries. Implement strict procedures for securing tools, equipment, and materials in the work area to reduce the risk of trips or manual handling accidents caused by inadequate storage or unsecured items. Establish designated walkways and work zones so that employees can move safely around the outdoor site without risking exposure to slips, trips, and falls hazards. Enforce regular rest breaks for staff involved in manual handling tasks to reduce the risk of fatigue-related injuries, and provide opportunities for stretching exercises to maintain flexibility and posture. Continuously monitor and review the effectiveness of implemented control measures and update the SWMS as required, engaging with employees to encourage their input and gather valuab	1L	
2. Equipment setup	Falling objects, Crushing hazards	3Н	 Properly inspect and maintain all equipment, tools, and machinery before commencing work to ensure they are in good working condition and free from any defects. Clearly instruct and train workers on the correct procedures for setting up and operating equipment, including how to effectively address potential falling object and crushing hazards. 	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Designate specific areas for the storage of materials, tools, and equipment used, to minimise the chances of unsecured items causing falling object or crushing injuries.		
			- Implement safety checks, such as regular inspect the throughout the day, to monitor that equipment is securely fastened and cored, reducing the risk of falling objects and crushing accidents.		
			- Use appropriate personal protective equipment (PPT such as hard hats, steel-toed boots, and high visibility vests for workers good in outdoor work, ensuring protection against falling debris and other hazard		
			- Establish clear communication thannels among to a promoers, using hand signals or communication do when cessary, so worke can be alerted immediately if there are potential alling coets of rush hazards present.		
			- Implement Susion zone around avv in a operations, equipment setup, and dismartling actives to present unauth and personnel from entering, thus miniful a pote.		
			- Emp () per life, techniques, which includes securing large, heavy objects with lifting g ar it slings, pes, and shackles to uphold stability and reduce the risk of objects lling bile be moved.		
			lise a proprior safety equipment such as barriers, cordons, and warning tape to man of the zardous areas, alerting workers to potential crushing or falling object langers.		
			- gularly review and update Safe Work Method Statements (SWMS) and optrational procedures, taking into account any updates in risk assessments, incident reports, or changes to the worksite environment.		
			- Encourage a 'safety-first' mindset among all workers on site by promoting active participation in safety discussions, toolbox talks, and ongoing hazard identification and reporting.		
			- Maintain site cleanliness and orderliness by proper housekeeping measures, removing any tripping hazards and keeping walking paths clear to prevent accidents that may lead to falling objects or crushing incidents.		
			- Engage in open dialogue with workers and involve them in decision-making processes where possible, ensuring their voices are heard when it comes to identifying and implementing effective safety controls.		
			- Clearly identify and mark live electrical conductors to help workers recognise and avoid them while working in the area.		
3. Work area establishment	Exposure to live electrical conductors, Unstable ground surfaces	4A	- Use appropriate Personal Protective Equipment (PPE) such as insulated gloves, helmets, and safety glasses to protect against accidental contact with live electrical conductors.	3H	
			- Implement barricades or restrict access to areas where live electricity is present to prevent unauthorised access and minimise exposure to risks.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			 Regularly check and maintain electrical equipment to ensure proper insulation, grounding, and operation as per manufacturer's recommendations and applicable standards. 		
			- Schedule work activities during periods of low sectrical demand or when power can be safely isolated to reduce the risk of successful with live conductors.		
			- Conduct site inspections to identify unstable round maces and take prompt action to repair or secure them before work contacts.		
			- Establish clear walkways a working platforms at are lever stable, and well-drained to minimise the risk of the stable, and falls the stable ground surfaces.		
			- Provide appropriation of an extruction to workers regarding potential hazards associated with the electric conditions and which be ground surfaces.		
			- Develop an ergency reponse place aling with incidents involving live elected conducts, including rescue pacedures and first aid measures.		
		\$	- Liais we utilities roviders and other authorities to coordinate work and obtain necess by the mits a reclearances when working in proximity to live electrical conductors. It lies a poper so hage and warning systems to alert workers about the presence of live feet all conductors and uneven ground surfaces.		
			Implemented regular toolbox talks and safety briefings to reinforce awareness of cards and ensure strict adherence to safe work practices and control measures. -Varidate the effectiveness of implemented control measures through ongoing monitoring and periodic audits, revising them as necessary based on any findings and feedback provided by workers.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
