

Pallet Ride On Powered | SAFE WORK METHOD STATEMENT (SWMS)

TASK OR ACTIVITY: Pallet Ride On Powered

Business Name: [Company Name]		ABN: [ABN]	SWMS#
Business Address: [Company Address]			
Contact Person:	Phone: [Phone]	Email:	

THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PROJECT MANAGER OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature: _____ Title: _____ Date: _____

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name: _____ Title: _____ Phone: _____

ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED | **NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS**

	NAME	SIGNATURE	DATE
Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, to conduct and communicate those hazards and then to further take steps to either eliminate or control each hazard.			
If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.			

CLIENT OR PRINCIPAL CONTRACTOR DETAILS

Client:	SCOPE OF WORKS Provide a detailed description of the specific work being carried out (otherwise known as scope of works).
Project Name:	
Project Address:

Date SWMS supplied to Project Manager:	

ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT

<input type="checkbox"/> involves a risk of a person falling more than 2 meters.	<input type="checkbox"/> is carried out on or near pressurised gas mains or piping.
<input type="checkbox"/> is carried out on a telecommunication tower.	<input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines.
<input type="checkbox"/> involves demolition of an element of a structure that is load-bearing.	<input type="checkbox"/> is carried out on or near energised electrical installations or services.
<input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure.	<input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere.
<input type="checkbox"/> involves, or is likely to involve, disturbing asbestos.	<input type="checkbox"/> involves tilt-up or precast concrete.
<input type="checkbox"/> involves structural alteration or repair that requires temporary supports to prevent collapse.	<input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor.
<input type="checkbox"/> is carried out in or near a confined space.	<input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant.
<input type="checkbox"/> is carried out in/near a shaft or trench deeper than 1.5m or tunnel involving use of explosives.	<input type="checkbox"/> is carried out in areas with artificial extremes of temperature.
<input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning.	<input type="checkbox"/> involves diving work.

ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY

<input type="checkbox"/> Forklift	<input type="checkbox"/> Crane/s	<input type="checkbox"/> Hoist/s	<input type="checkbox"/> Excavator	<input type="checkbox"/> Backhoe/Loader	<input type="checkbox"/> Boom Lift	<input type="checkbox"/> EWP	<input type="checkbox"/> Genie Lift
<input type="checkbox"/> Trencher	<input type="checkbox"/> Drilling Rig	<input type="checkbox"/> Trucks	<input type="checkbox"/> Formwork	<input type="checkbox"/> Bobcat	<input type="checkbox"/> Flammable Gas	<input type="checkbox"/> Fuel	<input type="checkbox"/> Dozer
<input type="checkbox"/> High Voltage	<input type="checkbox"/> Mulcher	<input type="checkbox"/> Tilt-up Panels	<input type="checkbox"/> Roller	<input type="checkbox"/> Scissor Lift	<input type="checkbox"/> Tractor	<input type="checkbox"/> Other -	

RISK MATRIX

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	Elimination Remove the hazard.
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	Substitution Replace the hazard.
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	2M MODERATE	Ensure control measures in place.	Isolation Isolate People from the hazard
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	1L LOW	Monitor and keep records	Engineering Isolate the hazard.
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH			Administrative Change the work. PPE

Notes on Hierarchy of Controls: Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE/FACE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips and trips from unsecured items, improper ergonomics	2M	<ul style="list-style-type: none"> - Keep the workplace clean and tidy: Regularly inspect the work area for any debris or obstructions and ensure all items are stored properly to avoid slips and trips. - Ensure proper footwear is worn: All workers should wear appropriate non-slip safety footwear, which provides grip and support during the operation of powered pallet ride-on equipment. - Proper ergonomics training: Provide ergonomics training to all workers, focusing on correct lifting techniques, body mechanics, and the importance of regular stretching. - Conduct daily pre-operational checks: Inspect the powered pallet ride-on equipment prior to use each day, looking for malfunctions or issues that may cause a hazard. - Implement a maintenance schedule: Maintain the powered ride-on pallet equipment according to the manufacturer's guidelines to ensure consistent performance and minimize the risk of mechanical failure. - Install safety signage and warning markers: Clearly mark hazardous areas and potential slip/trip zones with appropriate signage and floor markings to alert workers and create safe pathways. - Anti-fatigue mats in stationary workstations: Install anti-fatigue mats in workstations where workers may be standing for extended periods, reducing the risk of muscle strain related to poor ergonomics. - Encourage proper posture: Encourage workers to maintain an upright posture while operating the powered pallet ride-on equipment and avoid slouching or twisting when handling loads. - Implement safe work practices: Train personnel on safe work practices, such as maintaining a safe distance from the edge of elevated surfaces, not overloading the machine, and being aware of other workers and equipment in the area. - Use personal protective equipment (PPE): Ensure all workers wear appropriate PPE, such as gloves, durable work pants, and high-visibility vests to maintain visibility and protect against any hazards. - Establish clear communication protocols: Develop specific communication methods amongst team members, whether through verbal or visual cues, to help promote awareness, cooperation, and safety during the operation of powered pallet ride-on equipment. - Conduct regular safety meetings: Hold periodic safety meetings to review workplace hazards, discuss any near misses or incidents, and reinforce the importance of adhering to safe work practices and procedures. 	1L	
2. Pre-Operational Check	Electrical hazards, inadequate maintenance	3H	<ul style="list-style-type: none"> - Regular Inspections: Conduct thorough pre-operational inspections of the pallet ride-on powered equipment to ensure all safety devices are functional and physical components are in good condition. 	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> - Proper Training: Ensure that all operators have received adequate training on how to use the equipment, handle emergencies, and identify potential electrical hazards before using the pallet ride-on powered equipment. - Maintenance Log: Establish and maintain a maintenance log to track routine servicing, repairs, and any issues identified during inspections, ensuring timely remediation of any defects. - Use Manufacturer's Guidelines: Always follow the manufacturer's guidelines for operating and maintaining the pallet ride-on powered equipment, including recommended maintenance intervals. - Lockout/Tagout Procedures: Implement lockout/tagout procedures when servicing or repairing the equipment to prevent accidental startup and exposure to electrical hazards. - Electrical Cord Management: Ensure electrical cords are well-maintained, properly secured, and kept away from high-traffic areas to minimise the risk of tripping or damage to the cords. - Ground Fault Circuit Interrupters (GFCI) Protection: Use GFCI protected outlets or power sources while operating the equipment to prevent electrical shocks due to ground faults. - Adequate Lighting: Ensure sufficient lighting is available in the work area to facilitate safe operation of the pallet ride-on powered equipment and allow workers to identify hazards easily. - Personal Protective Equipment (PPE): Provide appropriate PPE, such as gloves and safety footwear, to protect operators and other workers from potential electrical hazards and injuries. - Emergency Response Plan: Have an emergency response plan in place outlining actions to be taken in case of an electrical accident, equipment malfunction or other emergencies related to pallet ride-on powered equipment. Train employees on how to follow this plan and regularly review and update it as necessary. 		
3. Charging Ride-On Pallet	Fire/explosion hazards from charging, chemical exposure (battery acid)	4A	<ul style="list-style-type: none"> - Ensure the charging area is well-ventilated and free from any ignition sources such as open flames or sparks to prevent fire/explosion hazards. - Implement a strict no-smoking policy in areas where batteries are being charged. - Have appropriate fire extinguishers readily available near the charging station in case of fire emergencies. - Make sure a qualified professional is responsible for setting up, inspecting, and maintaining the charging station, ensuring all electrical connections are secure and functioning properly. - Regularly inspect the condition of the battery, charger, and electrical connections for potential damage that could lead to hazards. Promptly address any issues identified. 	3H	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> - Ensure employees are trained on safe battery-handling procedures, including proper lifting techniques and the use of necessary personal protective equipment (PPE) such as gloves and safety goggles. - Establish clear signage and instructions around the charging station, highlighting potential hazards and reminding workers of safety measures. - Use a spill containment system, such as a spill tray, spill absorbent pads, to prevent battery acid from escaping onto the work environment in case of leaks or spills. - Ensure all workers handling batteries are familiar with emergency response procedures, including the location and use of eyewash stations and first aid kits. - Properly store and handle battery acid according to manufacturer's instructions and relevant guidelines to minimize chemical exposure risks. - Encourage regular breaks for workers during the charging process, reducing the time spent exposed to potential hazards. - Manage the disposal of damaged batteries and their components following environmental regulations to mitigate possible chemical hazards to workers or the environment. - Conduct regular hazard assessments and update control measures as needed, considering technology advancements or changes in workplace conditions. - Encourage workers to report any signs of hazards or incidents, fostering open communication and collaboration to maintain a safe working environment.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.	<input type="checkbox"/>	<input type="checkbox"/>	
Names and signatures of all relevant personnel consulted during the development of the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input type="checkbox"/>	<input type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input type="checkbox"/>	<input type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Check control measures added to the SWMS are the most effective solutions.	<input type="checkbox"/>	<input type="checkbox"/>	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	<input type="checkbox"/>	<input type="checkbox"/>	
Permit requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS identifies plant and equipment to be used.	<input type="checkbox"/>	<input type="checkbox"/>	
Details of inspection checks required for any equipment listed are noted on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Describes any mandatory qualifications, experience, training, skills required to perform the work.	<input type="checkbox"/>	<input type="checkbox"/>	
Applicable personal protective equipment is selected on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Lists any required permits or licenses.	<input type="checkbox"/>	<input type="checkbox"/>	
Reflects and documents any legislative references and/or Australian Standards.	<input type="checkbox"/>	<input type="checkbox"/>	
Identifies any hazardous substances used with specific control measures in line with any SDS.	<input type="checkbox"/>	<input type="checkbox"/>
