

Picking Freight | SAFE WORK METHOD STATEMENT (SWMS)

TASK OR ACTIVITY: Picking Freight

Business Name: [Company Name]

ABN: [ABN]

SWMS#

Business Address: [Company Address]

Contact Person:

Phone: [Phone]

Email:

THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature:

Title:

Date:

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name:

Title:

Phone:

ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED

NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.

NAME

SIGNATURE

DATE

If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.

Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.

The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

CLIENT OR PRINCIPAL CONTRACTOR DETAILS

Client:	SCOPE OF WORKS Provide a detailed description of the specific work being carried out (otherwise known as scope of works).

<input type="checkbox"/> High Voltage	<input type="checkbox"/> Mulcher	<input type="checkbox"/> Tilt-up Panels	<input type="checkbox"/> Roller	<input type="checkbox"/> Scissor Lift	<input type="checkbox"/> Tractor	<input type="checkbox"/> Other -	

RISK MATRIX									
LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS	
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			Elimination Remove the hazard.	
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	Substitution Replace the hazard.	
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	Isolation Isolate People from the hazard	
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	Engineering Isolate the hazard.	
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	Administrative Change the work.	
Notes on Hierarchy of Controls: Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.									

PERSONAL PROTECTIVE EQUIPMENT (PPE)											
FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
											
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
- workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Incorrect equipment choice, Poor communication	2M	<ul style="list-style-type: none"> - Conduct a pre-start toolbox meeting to discuss the tasks, hazards, and control measures involved in picking freight. - Ensure all workers are well-trained and competent in meeting their health and safety responsibilities, including identifying hazards and applying appropriate risk controls. - Utilise clear communication channels and protocols among team members to avoid misunderstandings during the freight-picking process, possibly through the use of walkie-talkies or hand signals. - Provide workers with a thorough inspection checklist that includes various equipment features and requirements for proper selection, usage, and maintenance. - Establish strict guidelines for equipment load limits and capacities to prevent overloading or misuse. - Implement clear visible signage detailing designated loading areas, restricted zones and safe traffic flow paths. - Allocate enough space for the operation of forklifts or other mechanical lifting aids to ensure smooth and easy maneuverability, reducing the likelihood of incidents. - Implement regular inspections and preventive maintenance schedules for all equipment used in the freight-picking process. - Develop an incident reporting and investigation procedure to encourage prompt reporting and resolution of any health and safety concerns or incidents. - Provide workers with appropriate personal protective equipment (PPE) - including high-visibility vests, hard hats, and steel-toed boots - and enforce its consistent use throughout the process. - Encourage ongoing communication between workers and management to receive feedback on hazards and control measures, allowing for continuous improvement of workplace safety practices. - Implement an equipment allocation system to ensure that only authorised personnel have access to specific lifting devices and machinery required for the task at hand. - Ensure emergency response procedures are in place, including first aid facilities and trained personnel, as well as clearly outlined evacuation plans in case of accidents or incidents. 	1L	
2. Equipment Inspection	Defective equipment, Lack of training	3H	<ul style="list-style-type: none"> - Regular equipment maintenance: Implement a routine maintenance schedule for all equipment involved in picking freight, in line with the manufacturer's recommendations. - Pre-use inspection: Train workers to conduct a thorough visual and functional inspection of equipment before commencing work to ensure it is in optimal working condition. 	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> - Equipment repair and replacement: Establish a procedure wherein broken or worn-out equipment is promptly reported, repaired, or replaced to minimise potential hazards. - Proper storage of equipment: Implement procedures to store equipment safely when not in use to avoid accidents from falling or dislodged items. - Training and competency assessment: Ensure that workers involved in picking freight have undergone adequate training in equipment usage and safety, as well as regular assessments to verify their competency. - Use appropriate PPE: Enforce the use of personal protective equipment (PPE), such as gloves, safety footwear, and hard hats, to reduce the risk of injuries resulting from defective equipment. - Clear communication channels: Establish clear communication protocols so workers can quickly report defective equipment to supervisors or management. - Limit access to authorised personnel only: Restrict the use of equipment to trained and competent individuals to prevent accidents due to lack of training or improper equipment usage. - Documentation and record-keeping: Maintain detailed records of equipment inspections, repairs, and replacements to monitor the overall condition of workplace equipment on an ongoing basis. - Encourage a proactive safety culture: Foster an environment where workers are encouraged to report any safety concerns, including defective equipment or lack of training, without fear of retribution. - Ongoing refresher training: Ensure workers receive regular reminders and updates on equipment safety protocols and any changes in company procedures to maintain awareness and understanding of safety regulations. 		
3. Safety Briefing	Unaware of hazards, Inadequate PPE	3H	<ul style="list-style-type: none"> - Conduct pre-shift safety meetings: Before starting work, organise a safety briefing with all employees involved in the picking freight process to discuss potential hazards, roles, and responsibilities. - Regular hazard communication: Continually make employees aware of hazards through visual aids such as signs, labels, and placards placed in high-risk areas. - Identify hazards: Assess and identify risks specific to the workplace environment, and establish relevant control measures for each identified hazard. - Develop a Standard Work Method (SWMS): Establish a standardised work procedure that covers every step of the picking freight process, including guidelines on handling materials safely and maintaining an organised workstation to minimise unexpected or uncontrolled hazards. - Appropriate training: Ensure all workers receive adequate training and certification, tailored to the specific requirements of the job, including manual handling techniques and equipment operation. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> - Personal Protective Equipment (PPE): Confirm employees wear appropriate PPE (such as gloves, steel-toed boots, hi-vis vests, etc.) while performing their tasks. - Pre-use inspection of PPE: Inspect PPE prior to use to ensure it is in good condition and can function correctly. - Maintenance and repair: Maintain all equipment used during picking freight in proper working order, and report and address any deficiencies immediately. - Incident reporting: Encourage employees to report accidents, injuries, or near misses immediately to their supervisors, which will help prevent similar incidents in the future. - First Aid Training: Train designated staff members in first aid protocol to assist injured colleagues promptly. - Emergency preparedness: Establish an emergency response plan and routinely conduct drills to familiarise employees with the plan and procedures. - Clear lines of communication: Maintain open communication channels between supervisors, management, and floor employees, addressing concerns promptly. - Attendance management: Monitor and manage attendance records to identify trends that may suggest fatigue or lack of attention among workers. - Review and update: Frequently evaluate and adjust safety measures based on ongoing inspections, feedback from employees, and any recorded incidents to ensure the relevance and effectiveness of these control measures in the workplace.

SAMPLE

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.	<input type="checkbox"/>	<input type="checkbox"/>	
Names and signatures of all relevant personnel consulted during the development of the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input type="checkbox"/>	<input type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input type="checkbox"/>	<input type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Check control measures added to the SWMS are the most effective solutions.	<input type="checkbox"/>	<input type="checkbox"/>	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	<input type="checkbox"/>	<input type="checkbox"/>	
Permit requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS identifies plant and equipment to be used.	<input type="checkbox"/>	<input type="checkbox"/>	
Details of inspection checks required for any equipment listed are noted on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Describes any mandatory qualifications, experience, training, skills required to perform the work.	<input type="checkbox"/>	<input type="checkbox"/>	
Applicable personal protective equipment is selected on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Lists any required permits or licenses.	<input type="checkbox"/>	<input type="checkbox"/>	
Reflects and documents any legislative references and/or Australian Standards.	<input type="checkbox"/>	<input type="checkbox"/>	
Identifies any hazardous substances used with specific control measures in line with any SDS.	<input type="checkbox"/>	<input type="checkbox"/>
