

Post Hole Auger | SAFE WORK METHOD STATEMENT (SWMS)

TASK OR ACTIVITY: Post Hole Auger

| | | |
|-------------------------------|------------|-------|
| Business Name: [Company Name] | ABN: [ABN] | SWMS# |
|-------------------------------|------------|-------|

Business Address: [Company Address]

| | | |
|-----------------|----------------|--------|
| Contact Person: | Phone: [Phone] | Email: |
|-----------------|----------------|--------|

THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

| | | |
|------------|--------|-------|
| Signature: | Title: | Date: |
|------------|--------|-------|

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

| | | |
|------------|--------|--------|
| Full Name: | Title: | Phone: |
|------------|--------|--------|

ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED | **NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS**

| | NAME | SIGNATURE | DATE |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|------|
| Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, to conduct and communicate those hazards and then to further take steps to either eliminate or control each hazard. | | | |
| If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity. | | | |
| Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel. | | | |
| The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident. | | | |

CLIENT OR PRINCIPAL CONTRACTOR DETAILS

| | |
|----------------------------------------|------------------------------------------------------------------------------------------------------------------------------|
| Client: | SCOPE OF WORKS Provide a detailed description of the specific work being carried out (otherwise known as scope of works). |
| Project Name: | |
| Project Address: | |
| Project Manager: | |
| Contact Phone: | |
| Project Manager Signature: | |
| Date SWMS supplied to Project Manager: | |

ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT

| | |
|---------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> involves a risk of a person falling more than 2 meters. | <input type="checkbox"/> is carried out on or near pressurised gas mains or piping. |
| <input type="checkbox"/> is carried out on a telecommunication tower. | <input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines. |
| <input type="checkbox"/> involves demolition of an element of a structure that is load-bearing. | <input type="checkbox"/> is carried out on or near energised electrical installations or services. |
| <input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure. | <input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere. |
| <input type="checkbox"/> involves, or is likely to involve, disturbing asbestos. | <input type="checkbox"/> involves tilt-up or precast concrete. |
| <input type="checkbox"/> involves structural alteration or repair that requires temporary support to prevent collapse. | <input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor. |
| <input type="checkbox"/> is carried out in or near a confined space. | <input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant. |
| <input type="checkbox"/> is carried out in/near a shaft or trench deeper than 1.5m or tunnel involving use of explosives. | <input type="checkbox"/> is carried out in areas with artificial extremes of temperature. |
| <input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning. | <input type="checkbox"/> involves diving work. |

ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY

| | | | | | | | |
|---------------------------------------|---------------------------------------|-----------------------------------------|------------------------------------|-----------------------------------------|----------------------------------------|----------------------------------|-------------------------------------|
| <input type="checkbox"/> Forklift | <input type="checkbox"/> Crane/s | <input type="checkbox"/> Hoist/s | <input type="checkbox"/> Excavator | <input type="checkbox"/> Backhoe/Loader | <input type="checkbox"/> Boom Lift | <input type="checkbox"/> EWP | <input type="checkbox"/> Genie Lift |
| <input type="checkbox"/> Trencher | <input type="checkbox"/> Drilling Rig | <input type="checkbox"/> Trucks | <input type="checkbox"/> Formwork | <input type="checkbox"/> Bobcat | <input type="checkbox"/> Flammable Gas | <input type="checkbox"/> Fuel | <input type="checkbox"/> Dozer |
| <input type="checkbox"/> High Voltage | <input type="checkbox"/> Mulcher | <input type="checkbox"/> Tilt-up Panels | <input type="checkbox"/> Roller | <input type="checkbox"/> Scissor Lift | <input type="checkbox"/> Tractor | <input type="checkbox"/> Other - | |

RISK MATRIX

| LIKELIHOOD | INSIGNIFICANT | MINOR | MODERATE | MAJOR | CATASTROPHIC | SCORE | ACTION | HEIRARCHY OF CONTROLS |
|----------------|---------------|------------|------------|---------|--------------|-------------|-----------------------------------|---------------------------------------------------------|
| ALMOST CERTAIN | 3 HIGH | 3 HIGH | 4 ACUTE | 4 ACUTE | 4 ACUTE | 4A ACUTE | DO NOT PROCEED | Elimination Remove the hazard. |
| LIKELY | 2 MODERATE | 3 HIGH | 3 HIGH | 4 ACUTE | 4 ACUTE | 4A ACUTE | DO NOT PROCEED | Substitution Replace the hazard. |
| POSSIBLE | 1 LOW | 2 MODERATE | 3 HIGH | 4 ACUTE | 4 ACUTE | 3H HIGH | Review before work starts. | Isolation Isolate People from the hazard |
| UNLIKELY | 1 LOW | 1 LOW | 2 MODERATE | 3 HIGH | 4 ACUTE | 2M MODERATE | Ensure control measures in place. | Engineering Isolate the hazard. |
| RARE | 1 LOW | 1 LOW | 2 MODERATE | 3 HIGH | 3 HIGH | 1L LOW | Monitor and keep records | Administrative Change the work. PPE |

Notes on Hierarchy of Controls: Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

| FOOT PROTECTION | HAND PROTECTION | HEAD PROTECTION | HEARING PROTECTION | EYE/FACE PROTECTION | RESPIRATORY PROTECTION | FACE PROTECTION | HIGH-VIS CLOTHING | PROTECTIVE CLOTHING | FALL PROTECTION | SUN PROTECTION | HAIR/JEWELLERY SECURED |
|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| | | | | | | | | | | | |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

| JOB STEP | POTENTIAL HAZARDS | IR | CONTROL MEASURES | RR | RESPONSIBLE PERSON |
|---------------------|---------------------------------------|--------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|--------------------|
| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK | NAME OF PERSON |
| 1. Preparation | Trip hazards, Unstable ground | 2M | <ul style="list-style-type: none"> - Conduct a thorough site inspection prior to commencing work to identify and mark out any potential trip hazards, such as uneven ground, obstacles, or protruding objects. - Ensure the work area is clean and free of water and debris that could cause trips or falls while operating the Post Hole Auger Post Driver. - Clearly communicate with team members about identified hazards in the work area, and post signage where necessary to alert workers and site visitors to the potential risks. - Provide appropriate personal protective equipment (PPE) for workers, including sturdy footwear, slip-resistant shoes and safety helmets, to reduce the risk of injury when working around trip hazards and unstable ground. - Utilise temporary ground stabilization methods, such as laying mats or planks, where necessary, to create a stable work surface for operating the Post Hole Auger Post Driver safely. - Regularly monitor weather conditions throughout the project duration, adjusting work plans to accommodate any adverse changes in weather that may impact ground stability or create new trip hazards (e.g., heavy rain leading to muddy and slippery conditions). - Implement comprehensive worker training and ongoing supervision to ensure all operators of the Post Hole Auger Post Driver are aware of best practices for maintaining a safe work environment and managing identified hazards. - Establish designated walkways around the worksite to minimise exposure to trip hazards and unstable ground by keeping foot traffic away from high-risk areas. - Where possible, plan to undertake work during daylight hours to maximise visibility and reduce the risk of encountering hidden obstacles that could pose trip hazards. - Schedule regular site inspections and hazard assessments as work progresses to ensure any new risks or changes to existing hazards are quickly identified and addressed appropriately. - Encourage open lines of communication between workers, supervisors, and management staff to promote a culture of safety on the worksite and ensure all team members are empowered to report concerns or potential hazards. | 1L | |
| 2. Site Inspection | Poor visibility, Overhead power lines | 2M | <ul style="list-style-type: none"> - Conduct a thorough site inspection before commencing work to identify potential hazards such as poor visibility and overhead power lines. - If possible, schedule the work during daylight hours or in well-lit conditions to minimise the risk of poor visibility. - Utilise high-visibility clothing and signage to ensure all workers are easily visible on the worksite. | 1L | |

| JOB STEP | POTENTIAL HAZARDS | IR | CONTROL MEASURES | RR | RESPONSIBLE PERSON |
|---------------------|----------------------------------------|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|--------------------|
| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK | NAME OF PERSON |
| | | | <ul style="list-style-type: none"> - Familiarise all staff with the location of overhead power lines and clearly mark these areas with warning signs and barriers. - Maintain a safe exclusion zone around overhead power lines, adhering to relevant legislation and guidelines. - Use a qualified spotter to guide equipment operators when working near overhead power lines, ensuring a safe distance is maintained at all times. - Regularly inspect and maintain all equipment, such as the post hole auger and post driver, to ensure they are functioning correctly and safely. - Provide appropriate training for all workers on how to operate the post hole auger and post driver safely and effectively. - Develop an emergency response plan that outlines the appropriate actions to take in case of a workplace incident or accident, including reporting procedures and first aid provisions. - Establish clear communication methods between all team members to maintain awareness of potential hazards and warn others if any new risks arise. - Encourage open feedback from all workers about potential hazards and control measures, allowing for continuous improvement of the worksite's safety. - Monitor weather conditions closely, and postpone work if heavy rain or high winds are likely to increase the risk of accidents. - Ensure all personnel have the necessary personal protective equipment (PPE) such as hard hats, gloves, and safety glasses, and provide training on their correct use and maintenance. | | |
| 3. Equipment Setup | Incorrect assembly, Damaged components | 3H | <ul style="list-style-type: none"> - Ensure that all operators have received appropriate training and are competent in the correct assembly and use of post hole augers and drivers. - Follow manufacturer guidelines and best practices for equipment setup and assembly, including cross-checking recommendations for bolt tightening and torque specifications. - Inspect equipment components thoroughly before assembly to identify any signs of wear or damage. - Replace any damaged, worn, or malfunctioning components with OEM-approved replacement parts prior to assembly and setup. - Use suitable personal protective equipment (PPE) throughout the setup process, such as gloves, safety glasses, hearing protection, and steel-toed boots. - Clear the designated work area of any potential hazards, including trip risks (cables, tools, debris), prior to setting up the equipment. - Set up equipment on level, stable ground, and ensure it is properly braced and secured according to the manufacturer's instructions. | 1L | |

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

| ITEMS WHICH MUST BE INCLUDED IN THE SWMS | COMPLETED | TO BE DONE | COMMENTS |
|----------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------|
