THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY 1	THE P. OF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	eting a business or undertaking (N=3U) is	required to ure at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions those hazards and then to further take steps to either the conditions of the conditions are or conditional talks.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Trip hazards, exposure to hazardous materials	2M	<ul> <li>Conduct a thorough risk assessment before starting the work to identify potential hazards and put necessary control measures in place.</li> <li>Keep the work area clean and tidy with approparte signage to avoid trip hazards, including marking out any uneven surfaces or protrusions that could cause tripping.</li> <li>Provide all workers involved with adequate proparties by a dective Equipment (PPE) such as safety boots, gloves, eye protection, or make any masks or respirators if required when dealing with hazardous materials.</li> <li>Ensure all workers have received proper training a manaring hazardous materials and are aware of safety pacedous and emergency in conse protocols in case of an accidental spiral exposer.</li> <li>Designate so cific areas or hazardous manarials storage away from the main work area, or suring they are soled in correct choelled containers with secure lids.</li> <li>Utility alboxes or porary barriers, or other means to provide safe walking paths around any ment, ords, or piping to minimise the possibility of tripping.</li> <li>Implement to ackoust yout system for any electrical components that may pose isks duting report or repracement of the sanitary plumbing stackwork.</li> <li>Exposition proper wentilation systems in enclosed spaces to mitigate hazardous material to osure and maintain tools and equipment to ensure they are in good we sing condition, and promptly replace any damaged parts or tools to prevent accidents.</li> <li>Encourage open communication among workers encouraging them to report any potential hazards or issues they may encounter during the repair or replacement process.</li> <li>Develop an emergency response plan complete with a designated evacuation route, assembly point, and prepared team members trained in first aid and the administration of any required treatments for hazardous material exposure.</li> </ul>	1L	
2. Inspection	Working at heights, falling objects	ЗН	<ul> <li>Proper Training: Ensure all workers engaged in the task have received adequate training and have demonstrated competence in working at heights, as well as understanding the risks associated with falling objects.</li> <li>Work Area Setup: Establish a designated work area around the base of the plumbing stack, using barrier tape or temporary fencing to restrict unauthorised access and reduce the risk of injury from falling objects.</li> <li>Height Safety Equipment: Provide personal fall protection equipment (such as harnesses, lanyards, and anchor points) to all workers working at heights and ensure it is properly inspected, maintained, and used according to manufacturers' guidelines and workplace procedures.</li> </ul>	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul> <li>Edge Protection: Install guardrails or suitable edge protection systems where possible to minimise the risk of falls from heights and limit potential falling object incidents.</li> <li>Tool Tethering: Secure all tools, materials, are adulpment with tool tethers or other attachment methods while working at height a prevent them from falling and causing injury.</li> <li>Ladder Safety: When using ladders, ensure to be in good condition and secured to prevent slipping or being knocked over. Works a should maint in three points of contact while ascending or despending ladders.</li> <li>Safe Manual Hand a stain we ters on proper many mandling techniques for lifting, carrying, a smane string stay materials or equipment to reduce the risk of strains and or or musculos setal in, see during the inspection process.</li> <li>Spott to Assistance: Assistance as spotter as net y monitor to provide assistance and watch a potential has as while workers perform their tasks at height. The spotter can allow force so work practices and ensure compliance with site safety guidelines.</li> <li>Regula Breat: Encestage workers to take regular breaks and rotate tasks to hinimise atigut which can impact focus and contribute to increased risks of wearing a height and handling dangerous objects.</li> <li>Incident apporting and Communication: Establish clear communication channels and incident reporting procedures to encourage immediate reporting of any hazards, no misses, or incidents related to working at heights or falling objects. Regularly review these reports to identify trends and areas for improvement in safety measures.</li> </ul>		
3. Tools & Equipment setup	Electric shock, improper handling	2M	<ul> <li>Regular Inspection and Maintenance: Ensure all tools and equipment are well-maintained, in proper working order, and have undergone regular inspections before usage.</li> <li>Use GFCI Outlets: Always use a Ground Fault Circuit Interrupter (GFCI) protected outlet when working with electrical tools and appliances to prevent electric shocks.</li> <li>Equipment Training: Make sure all workers are thoroughly trained on the correct usage, handling, and safety protocols for the specific tools and equipment being used for the task.</li> <li>Personal Protective Equipment (PPE): Ensure all workers wear appropriate PPE, such as gloves, safety eyewear, and footwear with non-conductive soles to minimise their exposure to the hazards involved.</li> <li>Ergonomic Work Practices: Encourage and follow ergonomic work practices, like proper lifting and carrying techniques, to minimise risks associated with improper handling of tools and equipment.</li> <li>Proper Storage and Handling: Store electrical tools and equipment in dry, safe locations when not in use, and transport them to and from the workplace using appropriate containers or carry bags.</li> </ul>	1L

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Tollow any sale work instructions which are provided, and agrees to use an reisonal riotective Equipment where appropriate.

### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
