

Scorpion 8×4 Screening	Plant   SAFE WORK METH	OD STATEMENT (SWMS)	
TASK OF	R ACTIVITY: Scorpion 8×4 Screer	ning Plant	
Business Name: [Company Name]		ABN: [ABN]	SWMS#
Business Address: [Company Address]			
Contact Person:	Phone: [Phone]	E fil:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE POST THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (N 3U) is	required to ture at a safe work method s	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE B PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched and in accordance with agislative requirements to first identify any site hazards, conditions inical those hazards and then to further take steps to either the conditions of the con	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must steam ately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

SPECIFIC WORK STEPS  HAZARDS THAT MAY ARISE  INITIAL RISK  SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS  - Provide adequate training for all team members to ensure they are well-versed in correct manual handling practices, as well as how to a felly navigate the Scorpion 8x4 Screening Plant environment Implement a regular inspection and maintaining ance schedule to keep walkways, access points, and working surfaces around the screen applicant in good condition,	RESIDUAL RISK	NAME OF PERSON

2. Transporting Plant	Collision with other equipment or vehicles, Unsecured load during transport	ЗН	Perform a pre-transport inspection: Before transporting the Scorpion 8x4 Screening Plant, carry out a thorough visual inspection to ensure that all safety mechanisms are in place and functioning properly.  Obtain required permits and clearances: Flourie that necessary transportation permits and road clearances have been accorded before summencing the transport process.  Driver competency: Only operators with appropriate training. He hases, and experience should be permitted to drive vehicles to sporting are Scorpion 8x4 Screening Plant.  Plan transportation route or for the ansport, develop a detailed route plan considering for ors such as lead contions, transportations, and weather to minimise risks of collists and loss of ontrol during journey.  Set of and fast of the dad property: Utilise appropriate chains, straps, binders, and or a coursing devices to safely fasten the Scorpion 8x4 Screening Plant onto the version of devices to safely fasten the Scorpion 8x4 Screening Plant onto the version of again a potential hazards.  Utilise a propriate again appotential hazards.  Utilise a propriate signage and warning devices: Install appropriate warning signs and thum stors (x.g., flashing lights, banners) on the transporting vehicle to increate a biblity and alert other road users about the oversized load.  It aintain safe following distance: Ensure a safe distance is maintained between the transporting vehicle and other vehicles, allowing sufficient time and space for braking and maneuvering during unforeseen circumstances.  Monitor weather conditions: Keep track of local weather updates and adjust the transport schedule or routes according to changes in conditions (e.g., rain, snow, fog) to avoid unsafe driving situations.  Conduct regular communication with other team members: The driver should be in constant communication with support personnel and spotters using radio devices or hands-free communication with support personnel and spotters using radio devices or hands-free communication with support personnel a	2M	
3. Set-up	Crushing hazards from plant components, Entanglement in moving parts	3H	- Comprehensive pre-operational inspection: Conduct a thorough visual inspection of the Scorpion 8x4 Screening Plant for any visible defects, paying close attention to moving parts and potential crushing hazards from plant components.	1L

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

	Tollow any sale work instructions which are provided, and agrees to use an reisonal riotective Equipment where appropriate.

### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
