

Self-Loading Concrete N	Mixer   SAFE WORK METHO	DD STATEMENT (SWMS)	
TASK O	R ACTIVITY: Self-Loading Concr	ete Mixer	
Business Name: [Company Name]		ABN: [ABN]	SWMS#
Business Address: [Company Address]			
Contact Person:	Phone: [Phone]	E qil:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PLOOF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	eting a business or undertaking (N 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions those hazards and then to further take steps to either the conditions of the conditions are or conditional talks.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

			A								

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Potential slip, trip and fall hazards, manual handling injuries	2M	<ul> <li>Ensure a clean, tidy work area is maintained at all times to minimise slip, trip, and fall hazards.</li> <li>Use appropriate signage and barriers to clean wark hazard zones or areas under construction.</li> <li>Ensure all workers are wearing appropriate a resonate ofective equipment (PPE), including sturdy footwear and high-visibility clo</li> <li>Implement manual handling aining sessions so at all error yees understand the correct procedures for lifting an carrying heavy ob, is</li> <li>Utilise mechanical associated with manual handla.</li> <li>Conduct region audits as inspection one worksite to identify potential hazards and rendiate compositely.</li> <li>Estatishelear plus edurals for the operation and movement of the self-loading concretion in to avoid collision-related injuries.</li> <li>Enforce strice otherend to safe operating rules, guidelines and protocols at all ness.</li> <li>Investivatives in identifying and assessing potential hazards; they often have aluables ughts into how to make their own tasks safer.</li> <li>sure the machine is always used according to the manufacturer's instructions to minimise any potential hazards.</li> </ul>	1L	
2. Load materials into mixer	Finger/hand injuries, eye injury from splashing cement	ЗН	<ul> <li>Ensure all workers are properly trained on how to operate the self-loading concrete mixer.</li> <li>Workers should always wear appropriate personal protective equipment (PPE) including hard hats, safety gloves, and eye protection.</li> <li>The area around the self-loading mixer should be cordoned off to keep non-essential personnel away from the loading process.</li> <li>A pre-use inspection of the machinery should be conducted to identify any faults or issues that might increase the risk of injury.</li> <li>Proper loading procedures and techniques should be strictly followed to minimise the risk of any material splashing out.</li> <li>All necessary safety guards must be in place before operation of the mixer commences.</li> <li>Ensure that no worker places their hands near or inside the mixer whilst it is running.</li> <li>Remain vigilant and maintain a safe distance while loading materials into the mixer to prevent any contact with moving parts.</li> </ul>	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- If there's any instance of splashed material, stop work immediately to clean the mess and avoid slips or falls.		
			- Adequate rest and rotation schedules for employ can ensure everyone remains alert and aware of potential risks.		
			- Safety briefings should be held regularly a einforce the apportance of health and safety regulations amongst workers.		
			- Emergency first aid kits and training should be adily available on site in the event of an injury or accident. Staff yould have an understanding assic first aid protocols.		
			- Provide and corce the coordinate personal protective equipment (PPE) such as hard atts, safety cosses, high visit of clothing, safety footwear, and hearing protection.		
			- Control egular conine maintenance to ensure all parts are functioning safely and cone.  - Implement to control out procedures to prevent accidental start-up or operation during in intensive or operation.		
			- E. Tre		
			rain employees on safe machine operation, including maintaining a safe distance from rotating parts, and constantly monitoring their surroundings.		
			Place barriers and signs around the work area to keep unauthorised personnel at a safe distance.		
3. Operate mixer	Machine entangler expose, rotating parts can caten clothing or lips	зн	- Conduct regular machine inspections for damaged or worn parts, and promptly repair or replace as necessary.	2M	
			- Install emergency stop buttons that are easily accessible in case of an urgent stoppage requirement.		
			- Use material handling tools or machinery such as mechanical hoists to add or remove materials from the mixer, reducing the risk of entanglement.		
			- Regularly review and update Safe Work Method Statements (SWMS) to reflect current best practices and compliance requirements.		
			- Safeguard controls like two-hand operating devices or light curtains to control hazardous conditions until they are safe.		
			- Establish and enforce a no loose clothing or jewellery rule around the machine to reduce the risk of entanglement.		
			- Implement a routine noise assessment to identify exposure levels, and plan works schedules to restrict prolonged exposure to high noise levels.		
			- Maintain a clean workplace to avoid slip, trip, and fall hazards that can lead to worker injury around and when operating the mixer.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

#### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.							
ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS				
The company details have been entered, including the project name and address.							
Names and signatures of all relevant personnel consulted during the development of the SWMS.		D'					
Name, signature, position and date signed of the person approving the SWMS.							
Specific personnel and qualifications, experience is noted in the SWMS.	P						
Provides a step-by-step process of tasks required to carry out the activity or task.							
Adequate risk assessment of any identified hazards has been completed.							
Foreseeable hazards are identified and documented for each step.							
Any hazards listed in any site risk assessments have been added to the SWI							
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.							
Check control measures added to the SWMS are the most effecting sections.							
Responsible person is assigned and listed on the SWMS for the implementation of contameasures.							
Permit requirements specified, such as Hot Wee, Electrical Work, Verat Heights etc.							
SWMS identifies plant and equipment to be u 1.							
Details of inspection checks required for any equipment listed at noted on the SWMS.							
Describes any mandatory qualifications, experience raining skills required to perform the work.							
Applicable personal protective equipment is selected on the SWMS.							
Lists any required permits or licenses.							
Reflects and documents any legislative references and/or Australian Standards.							
Identifies any hazardous substances used with specific control measures in line with any SDS.
