

Servicing Taps and Water I	Bubblers   SAFE WORK ME	THOD STATEMENT (SWMS)									
TASK OR A	CTIVITY: Servicing Taps and Wa	ter Bubblers									
Business Name: [Company Name]		ABN: [ABN]	SWMS#								
Business Address: [Company Address]											
Contact Person:	Phone: [Phone]	E fil:									
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE P OF THE PROJECT									
Under the Work Health and Safety Regulation (WHS Regulation), a person conductive proposed work starts.	cting a business or undertaking (k 3U) is	required to ture that a safe work method s	tatement (SWMS) is prepared before								
Full Name:											
Signature:		Title:	Date:								
Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, well as reviews and modifications of the SWMS.											
Full Name:		Title:	Phone:								
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED		LL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND								
Safety meetings or toolbox talks will be sched ed in accordance with regislative requirements to first identify any site hazards, conditioned inical those hazards and then to further take steps to either the sched or condition of the actional each azard.	NAME	SIGNATURE	DATE								
If an incident or a near miss occurs, all work must successful and the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.											
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.											
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips, and falls, Manual handling injuries	2M	<ul> <li>Implement housekeeping practices: Ensure that the work area is clean, well-organised and free from clutter, debris or any obstacts which may lead to slips, trips, and falls.</li> <li>Use appropriate footwear: Workers should use also be the cloud slipping, tripping or falling.</li> <li>Inspect flooring surfaces: Regularly check for a lowet, slippeneur uneven surface areas and address any hazal timmediately (e.g., u drying use floor or using temporary matting).</li> <li>Mark/identify produital haards: unarly mark appropriate loor or using temporary matting.</li> <li>Mark/identify produital haards: unarly mark appropriate workers on proper lifting techniques and use the arrow of the any objects and help prevent accidents.</li> <li>Provide trainmoon many handling usingles: Educate workers on proper lifting techniques and use the arroy objects safely so as not to strain their backs or other body use.</li> <li>Utilisk network of injuries related to manual budgit terms instead of manually lifting them.</li> <li>Share to sano, usignated locations when not in use, maintaining clear pathways and educing using and for leavy lifting: Identify tasks involving heavy lifting in advance and break down these tasks into smaller, manageable loads, or arrange for additional help from coworkers.</li> <li>Design ergonomic workspaces: Arrange often-used items within easy reach (between knee and shoulder height) to minimise bending, stretching, or twisting motions while working on taps and water bubblers.</li> <li>Rotate job tasks: If possible, rotate employees between different tasks to reduce repetitive motion and decrease the risk of manual handling injuries over time.</li> <li>Take regular breaks: Encourage workers to take short, frequent breaks to stretch or rest, especially if they are engaged in physically demanding tasks.</li> <li>Communicate openly about hazards: Encourage an open dialogue between employees and supervisors regarding concerns or issues related to workplace safety, so that any risks can be addressed pr</li></ul>	1L	
2. Isolation	Electric shock, Inadvertent valve operation	3H	- Ensure all electrical equipment near the work area is switched off and isolated using lockout/tagout procedures to prevent electric shock.	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Conduct a thorough risk assessment prior to commencing work to identify potential hazards associated with the tasks and implement control measures accordingly.		
			- Use non-conductive tools and insulated gloves where working with or around electrical equipment to minimise the risk of electrical shock.		
			- Keep the work area dry and free from any enter source that could cause an electrical hazard.		
			- Provide temporary barriers or warning signs a stud the work a ba to alert other workers of the ongoing service a activities and post tial haze.		
			- Verify the proper isolation of verses and power sup, testing them before starting any work starting the wave bubblers.		
			- Schedule remain mainter the and spectic of electrical equipment to ensure its safety and fun conality, locaring the and the offen of an unexpected electric shock.		
			- Training there is a proparactices for servicing taps and water bubblers, including how to be visolated and handle electrical equipment.		
			- Employ a point-to-context system to ensure only competent and authorised personnel are coved coarry out specific tasks related to isolation and servicing.		
			- slement emergency response procedures in case of accidental valve operation, incluing mediate stop-work protocols and timely incident reporting.		
			Regularly communicate safety reminders and toolbox talks to staff reinforcing the in ortance of following isolation procedures and proactive reporting of potential hazards.		
	S		- Maintain up-to-date records of training, equipment inspections, and maintenance activities as evidence of a robust safety management system.		
			- Continuously review and update the SWMS based on lessons learned, changes in		
			work processes, or regulatory requirements to ensure its effectiveness in managing risks associated with isolation and valve operation while servicing taps and water bubblers.		
			<ul> <li>Implement a routine tools inspection procedure before starting work to ensure they are in good working condition and safe to use.</li> </ul>		
			- Ensure all employees receive proper training on the correct use and handling of specific tools required for servicing taps and water bubblers.		
3. Tools Inspection	Faulty tools, Incorrect tools for task	2M	- Establish a clearly defined protocol for reporting and repairing faulty tools and equipment.	1L	
			- Clearly label and store tools according to their designated purpose and usage.		
			- Ensure power tools are regularly serviced, maintained, and tested for electrical safety compliance.		
			- Train employees on the proper selection of appropriate tools for each task and discourage improvisation or use of incorrect tools.		

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Encourage workers to perform visual checks on tools' condition, such as inspect and snugly tighten any loose bolts, handles, cords, or other connections.		
			- Make sure that a well-stocked, organised, and accussible toolbox is available onsite for easy access to appropriate tools.		
			- Assign a responsible person (e.g., a super sor) to more and enforce the implementation of these control measures.		
			- Provide Personal Protective Equipment (PPE) on as gloves vewear, and hearing protection for tasks to plving the use of how and personal personals.		
			- Encourage workers to report a discomfort, pain, they related to tools use immediately for property ssme and management.		
			- Conduct remar audits or polbox wiks to mus awareness and discuss tool- related hazan vissues, a preventive outres.		
			- Corrected usly recent pdate, and improve tools inspection and maintenance proce in based new tools or changing safety regulations.		
			- Estable have stem to tracking and documenting the tools inspection process, includin, record of any ocidents, corrective actions, and subsequent follow-ups.

#### EMERGENCY RESPONSE - CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

#### SAF WC A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to review the sure it remains revised if necessary) if relevant control measure are a conconsultation with workers (including contractors are subcontract of the SWMS and their health and safety representatives who re workplace.

ke sure it remains effective and must be reviewed (and are subcontractions) who may be affected by the operation sentatives who received that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

#### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWN			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting sections.			
Responsible person is assigned and listed on the SWMS for the imement of cont, measures.			
Permit requirements specified, such as Hot Wey, Electrical Work, Verat Heights etc.			
SWMS identifies plant and equipment to be up t.			
Details of inspection checks required for any equipment listed approved on the SWMS.			
Describes any mandatory qualifications, experience vaining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
