

Transit Mixer S	AFE WORK METHOD STA	TEMENT (SWMS)	
-	TASK OR ACTIVITY: Transit Mixe	er .	
Business Name: [Company Name]		ABN: [ABN]	SWMS#
Business Address: [Company Address]			
Contact Person:	Phone: [Phone]	E fil:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE POST THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (N 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED		LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with agislative requirements to first identify any site hazards, conditions unical those hazards and then to further take steps to either the conditions are or conditions.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standard the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Incorrect manual handling, Exposure to hazardous substances, Fall from height	ЗН	 Properly train workers on the correct techniques for manual handling to prevent injuries like strains, sprains or even fractures. Ensure workers wear appropriate PPE, such a gloves and long-sleeved shirts, to protect against exposure to hazardous subtraces during preparation. Set up a secure barrier around the work are no present any accidental falls from height during the preparatory stages. Regularly inspect all equiptions, including the Thousit Mixers profesure use to identify and fix any potential problems a safety hazards. Implement a strict case of eping plicy to maintain a dy and obstacle-free workplace, decreasing the lock of the land falls. Store hazare as substant as propers, and a with Australian regulations, and avoid unner dary has lling for an inimise exposure risks. Consider adjustant decking platforms to reduce risks associated with working at heights turn spreparation. Use michantal lifting a quipment, where possible, to aid in handling heavy or bulky hads, decreasing the risk of manual handling injuries. Einstage trikers are trained in the identification, handling and safe disposal of any azardo, substances they may encounter. wide regular breaks to ensure workers do not become overly fatigued, sowething that can lead to decreased concentration and increased accidents. Involve workers in routine safety meetings and consult them about ways the safety in their work environment might be improved. Support an open reporting environment where workers feel comfortable reporting potential hazards or risky behaviour without fear of retribution. 	2M	
2. Vehicle Checking	Vehicle collision, Inadequate maintenance of vehicle	3H	 Conduct a comprehensive pre-start inspection on the transit mixer daily, checking for any visible signs of damage or wear and tear. Implement a regular maintenance schedule to ensure that all components of the vehicle are appropriately serviced and functioning correctly. Employ qualified mechanics to perform periodic inspections focussing on critical systems including brakes, steering, tyres, lights, etc. Ensure adequate driver's training is provided, focusing on manoeuvring skills, speed controls and understanding of vehicle dimensions and limits. Establish and adhere to stringent safe driving practices and road rules. Equip the vehicle with reversing cameras and proximity sensors to prevent collisions during reverse operations. 	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Mandate use of signal lights when turning or changing lanes to inform other drivers of intentions.		
			- Instruct drivers not to operate the transit mixer if the seem to be any mechanical problems and report immediately to supervisor		
			- Encourage defensive driving techniques to e aware, propared, and able to respond to unforeseen incidents on the road.		
			- Keep the transit mixer's lights, mirrors and win treen clean for maximum visibility.		
			- Advocate wearing seat belts all times while op ting the vehicle.		
			- Monitor vehicle's I capace to ensure it is even distributed and never exceeded.		
			- Make use of affic management plating as with heavy vehicular movement to control low and revent cidents.		
			- Enfo to zero-to cance policy towards alcohol, drugs and fatigue related driving to elim alc uch his risk behaviours.		
			Ensure III star prolived are trained and adhere to safe loading procedures to purent hind injuries. This includes proper techniques for lifting, pulling, pushing, or carry. The ich should be detailed in a training program.		
			Provide personal protective equipment (PPE) such as dust masks or respirators to make the inhalation of dust during the mixer loading process.		
			Implement noise control measures such as earplugs or earmuffs for operators and nearby workers to reduce potential for noise-induced hearing loss.		
			- Regularly maintain and check the condition of transit mixers to ensure they're in good working order to prevent malfunctions that could lead to accidents or increased dust/noise emission.		
3. Mixer Loading	Dust Exposure, Noise Exposure, H d injuries	4A	- Implement regular breaks for mixer operators to minimise continuous exposure to hazards such as dust and noise. Workers should be given the opportunity to recuperate away from the worksite.	2M	
			- Use machinery with noise reducing features whenever possible. Transit mixers should be selected based on not just efficiency but also their noise emission ratings.		
			- Clear signage indicating hazards, such as high dust areas or high noise areas, should be visibly placed around the work site. This will help raise awareness among staff and site visitors.		
			- Regular health checks should be provided for the staff to detect any negative impacts due to dust and noise exposure at an early stage and treated accordingly.		
			- Adequate ventilation should be provided where the mixer is loaded to disperse dust, reducing the concentration that workers might inhale.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P A	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWI			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting sections.			
Responsible person is assigned and listed on the SWMS for the imperent of contameasures.			
Permit requirements specified, such as Hot Work, Electrical Work, Vorat Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed at noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
