

Water Pump   S	AFE WORK METHOD STAT	EMENT (SWMS)	
	TASK OR ACTIVITY: Water Pump	o	
Business Name: [Company Name]		ABN: [ABN]	SWMS#
Business Address: [Company Address]			
Contact Person:	Phone: [Phone]	E 1il:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE P. OF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (N 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED		ILL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with agislative requirements to first identify any site hazards, conditions unical those hazards and then to further take steps to either the conditions are or conditions.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standard the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

			A								

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Trip hazards, Improper equipment handling	2M	<ul> <li>Ensure the work area is clean and free from trip hazards before starting work. This can be achieved by regularly tiding and removing und cessary items from the workspace.</li> <li>Wear appropriate personal protective equit ment (PPE) at all times to minimise the risk of injuries. This could include safety foot par with a slip soles, gloves for handling equipment and safety glasses.</li> <li>Be sure that staff are properly briefed about the right handling equipment. They should be made aware of the crrect lifting technic is to are injury.</li> <li>Regularly inspect on cent for my damage or weal and tear that might make it unsafe for use. It would be replace for repaired as required.</li> <li>Use proper fety gear were working aroundwater pump operations to prevent slipping for falls.</li> <li>Sels a right of and devices for the particular task. Check them for any defect on mages refore use.</li> <li>Keep talkings clean cords, hoses or any other obstructions that could lead to tripping cide.</li> <li>Increase of warming signs and barriers in high-risk areas, to alert others to potential the water pump is secured correctly before beginning operation.</li> <li>Lone machines may vibrate and cause falls.</li> <li>Always carry out a thorough risk assessment before starting work. Understand all potential threats and have strategies in place to control them.</li> <li>Ensure workers are appropriately trained on the significance of health and safety procedures as well as emergency protocols. Continuing education on safety measures will ensure their effectiveness.</li> </ul>	1L	
2. Site Assessment	Unclear signage, Inadequate lighting	2M	<ul> <li>Conduct site inspections prior to starting any work, ensuring that all potential risks are identified and mitigating strategies are put in place.</li> <li>Clear identification and proper placement of signage within the site is essential, helping to guide workers and prevent accidents.</li> <li>Signage should be regularly checked to ensure they are accurate, present, and not faded or damaged, replacing if necessary.</li> <li>The work area should be lit adequately using both natural and artificial light sources, to ensure visibility at all times during working hours, preventing accidents caused by poor lighting.</li> <li>In case work extends into low-light times, sufficient auxiliary lighting should be installed beforehand, such as strong LED work-lights.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul> <li>Reflective materials could also be used to improve general visibility around the work site, especially for key safety signage and areas of possible hazard.</li> </ul>		
			- Regular audits and risk assessments should be retaken to identify hazards like unclear signage and inadequate lighting before they become major issues.		
			- Mandatory safety procedures and protocol must always e adhered, including wearing appropriate personal protective equation (Para), like high-visibility clothing and hard hats.		
			- Workers should be appropriately trained and educated about ealth and safety regulations pertaining to their it is within the working.		
			- Finally, it's important appropriate appropriate and properties of communication so that employees feel comfortable regarding any pential quest they acce around unclear signage or inadequate in fing on the second communication so that employees feel comfortable regarding any pential questions are signaged or inadequate in fing on the second communication so that employees feel comfortable regarding any pential questions are signaged or inadequate in fing on the second communication so that employees feel comfortable regarding any pential questions are second communication and the second communication and the second communication are second communication.		
			- Proper resonance tective Equipment (PPE): The workers should have proper safety as the helicity, boots, goggles, gloves, high-visibility jackets and earplugs, where cell ry.		
			Compresense Emergency Plan: Develop a comprehensive emergency plan comprehensive emergency plan comprehensive emergency plan comprehensive emergency plan.		
			Regular Laining & Drills: Workers should be provided with regular Work Health & Infety (Vvs) training. Emergency drills should also occur periodically.		
			- 3 specific Training: Workers handling the water pump must receive job-specific training to understand the operation and potential hazards of using the device.		
Safety Precautions	Lack of safety gear to gency in	эц	- Use Certified Equipment: Ensure the water pump and other related equipment are certified for safety standards.	21/4	
setup	Lack of safety geal and gency in	ЗН	- Pre-shift Equipment Check: Always perform an equipment check before starting work to ensure everything is functioning correctly. Any maintenance needed should be reported immediately.	2M	
			- SafeWork Procedures: Adhere to all SafeWork procedures in place to prevent incidents and injuries.		
		- Adequate signage and warnings: Utilise safety signs for hazardous areas and provide clear instructions on the use of the machinery. All potential hazards should be clearly labelled and communicated.			
			- First Aid: Maintain ready access to first-aid facilities and make sure it's fully stocked. Workers should also know how to use them.		
			- Routine Monitoring: Conduct routine monitoring and assessments to identify any potential risks and threats early and take preventive measures.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P A	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effections.			
Responsible person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person is assigned and listed on the SWMS for the imperent person person is assigned and listed on the SWMS for the imperent person per			
Permit requirements specified, such as Hot Work, Electrical Work, Vocat Heights etc.			
SWMS identifies plant and equipment to be u 1.			
Details of inspection checks required for any equipment listed at noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
