THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PL OF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (N 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED		LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions unical those hazards and then to further take steps to either the conditions of the conditions are or conditions.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must stem attely. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Improper Personal Protective Equipment (PPE), Inadequate training	3H	 Ensure that all workers have received appropriate safety training about the job risks and hazards associated with handling a water tanker Employers should provide personal protective a dipment (PPE) suitable for the type of work to be performed, e.g., helmets a unity glasses, high-visibility clothing, etc. Regular checks should be conducted to ensure the is in good condition and is being worn correctly by all employees. Incorporate mandatory risk are assment procedure the forestarting any work involving a water table. Workers must be live regular reflected training dessions on the uses and limitations of the edition of the editi	2M	
2. Arrival at Site	Traffic hazards, Slip/Trip/Fall hazards	2M	 Ensure all vehicle inspections are completed before arrival at the site, including tyre pressure checks and fluid levels. Rigorously obey all road rules during transit to ensure safe arrival at the workplace. Use experienced drivers who are familiar with the destination to minimise the risk of accidents or mishaps en route. Ensure that all personnel involved in operations have received traffic management & control training. Ensure that high visibility clothing and PPE are worn at all times by all personnel. Establish a safety perimeter or exclusion zones where vehicles will be moving or reversing to reduce traffic hazard. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON	
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON	
			- Select entrance and exit points to the site which offer clear visibility for both pedestrians and drivers.			
			- Keep the site clean and free of debris to prevent strip hazards. Regular cleaning schedules should be implemented.			
			- Adequate lighting should be provided if we is being contact out after daylight hours.			
			- Conduct regular hazard inspection and walkin, ath reviews to nitigate trip and fall hazards.			
			- Ensure floor surfaces are even and sufficiently slip unt.			
			- Plan site layout that in the erials, imponents can be safely stored and transported within the sit			
			- Train vorkers a safe moual handling chniques to prevent injury resulting from lifting shifting by tems.			
			- Implementation embedding ency plan for quick response to any accident or incident that occurs in short o minimate harm to personnel and machinery.			
	•		- sure personal involved in the unloading process have undergone proper many by dling training.			
				Ise mechanical aids such as forklifts or cranes wherever applicable to minimise in qual handling risks.		
			Place necessary traffic management measures to guide vehicles and pedestrians around the unloading area.			
			- Conduct pre-operational checks on all equipment to ensure they are fit for purpose.			
			- Make sure that Personal Protective Equipment is worn by everyone involved in the unloading operation.			
3. Equipment Unloading	Manual handling injuries, Common with other vehicles or pedestrians	2M	- Define clear work procedures including two-way communication methods between operators during the unloading process.	1L		
•	other verticies or pedestrians		- Designate a trained spotter to oversee the unloading process and watch for potential hazards or approaching individuals or vehicles.			
			- Enforce slow speeds within the unloading area to mitigate collision risks.			
			- Schedule the unloading process during non-peak hours to reduce interaction with pedestrians and other vehicles.			
			- Maintain clean, clutter-free surroundings to reduce trip and fall hazards during unloading.			
			- Ensure the vehicle's emergency parking brake is engaged during the unloading process to prevent accidental movement.			
			- Regularly service and maintain all equipment used in the loading and unloading process to ensure reliability and safety.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.			
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWI			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effections.			
Responsible person is assigned and listed on the SWMS for the imperment of continues we see that the second of continues we see that the s	res.		
Permit requirements specified, such as Hot Work, Electrical Work, Vocat Heights etc.			
SWMS identifies plant and equipment to be u 1.			
Details of inspection checks required for any equipment listed at noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work	. 🗆		
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
